ABSTRACT

A general overview of information related to Texas schools is presented for the 1990-91 school year. The document begins with an examination of state level statistical data and concludes with detailed information about each school district. The state level statistical highlights section discusses administrative units, students, student performance, district staff, and finances for the current year and historical trends. The detailed statistics section provides extensive school district level information on the same areas, divided into 3 parts: (1) 91 data items summarized by groups of school districts characterized by size, rural versus urban classification, property wealth per student, tax effort, and Education Service Center region; (2) tables showing the value of each item at various percentiles of school districts; and (3) values of all data items for each school district. Twenty-five exhibits in the statistical highlights and extensive school district tables present the information and make up the bulk of the report. Appendixes list the data sources, clarify items not addressed elsewhere, and list the districts in alphabetical order. (SLD)

SNAPSHOT '91:

1990-91 School District Profiles

**Texas Education Agency
Department of School Support Services
1701 N. Congress Avenue
Austin, Texas 78701**

**Spring 1992
Publication Number GE2 072 02**

Spring 1992

The fourth edition of **Snapshot** is issued at a time when public education in Texas is undergoing significant changes. As the new commissioner of education, I see numerous challenges for the state. Above all, Texas education must focus its efforts on achieving excellence and equity in student performance.

This edition contains data for the 1990-91 school year. New approaches in education policy, such as the emphasis on site-based management, are now being implemented and will impact the data in future editions. For example, as schools move toward equity and excellence, test scores will improve and the gap between performance for economically disadvantaged and non-economically disadvantaged students will narrow.

With the publication of **Snapshot '91** the state may be engaged in another special session devoted to the issue of equitably financing public education. Given the high level of uncertainty surrounding this issue, information about all aspects of public education can provide useful insight about the operations and effectiveness of our school systems. **Snapshot '91** should serve as a resource for educators, legislators, members of the business and research communities, and all citizens who are concerned about achieving excellence and equity in student performance.

Sincerely,

A handwritten signature in dark ink, appearing to read "Lionel R. Meno", with a long horizontal flourish extending to the right.

Lionel R. Meno
Commissioner of Education

ACKNOWLEDGMENTS

The preparation of this document would not have been possible without the assistance of many people. First, appreciation goes to the many local school district and regional Education Service Center officials who report the vast majority of the information that is used. The quality of the data they submit directly affects the quality of this document.

Next, many Texas Education Agency staff deserve credit for so freely contributing their time although they were not part of the project staff. These include readers Maureen Moore Scheevel, Linda Hargrove, Shannon Housson, Ester Calderon, and Rob Scott; photographer Jack Brown; data processing staff in Technology Applications; and staff in the Division of Program Evaluation who assisted with data analysis.

Thanks also go to the students and staff of Hillcrest Elementary and Del Valle High School of the Del Valle Independent School District for appearing in the cover photographs.

Introduction

Snapshot '91: 1990-91 School District Profiles, presents a general overview of information related to Texas public schools for the 1990-91 school year. The Texas Education Agency (TEA) considers the publication of this annual statistical report to be a step toward greater accountability at both the state and school district levels as it will make available a wide variety of data in a consistent format from year to year.

This publication will be helpful to anyone interested in learning more about public education in Texas, whether they are concerned citizens, educators, legislators, or research organizations.

Document Organization

This document begins with an examination of state level data and concludes with detailed information about each school district.

The state level, or *Statistical Highlights* section, discusses the major areas of administrative units, students, student achievement, staff, and finance, and covers both the current year and historical trends. Graphic illustrations are included in this section.

The *Detailed Statistics* section provides extensive school district level information on the same major areas discussed in the *Highlights* section. The *Detailed Statistics* section contains three parts.

First, 91 data items are summarized for groups of school districts categorized by size, by a rural versus urban classification, by property wealth per pupil, by tax effort, and by Education Service Center region.

Second, the distribution of these items is presented in tables showing the value of each data item at various percentiles of school districts. The highest, lowest, and median values for each data item are shown in addition to values at the 5th, 10th, 25th, 75th, 90th, and 95th percentiles. This section is labelled *Distribution Statistics*.

Third, values for all data items are listed for each school district, followed by a state summary. This section, labelled *District Detail*, is in county name order with districts arranged alphabetically within county.

Definitions of the 91 data items follow the *District Detail*. The definitions are in numerical sequence by the number of the item.

Snapshot concludes with three appendices. The first, *Data Sources*, lists the sources of data in alphabetical order by the abbreviations used throughout the document. Each major source of data is described and accompanied by a listing of associated data items.

End Notes, the second appendix, is intended to clarify terms that are not thoroughly addressed in other parts of the document.

The third appendix, *District Listing*, contains a listing of school districts in alphabetical order by name, with Education Service Center (ESC) and State Board of Education (SBOE) assignments as well as each district's county district number. This listing will help readers locate a particular district in the *District Detail* section by relating the district name to the appropriate county.

Overview of Data Sources

The vast majority of data in this document is reported to the TEA by school districts. The 1990 fall data collection for the Public Education Information Management System (PEIMS) is the primary source of data. In addition to the staff and financial data, student information was obtained this year through the PEIMS collection process. Information obtained from the State Property Tax Board (SPTB) for the 1990 calendar year is also used. Student test scores are reported to the TEA by the testing companies.

Virtually the same 91 items are presented in this edition as were presented last year. These 91 items span six pages, therefore a new set of districts is presented every sixth page. While there is some analysis of state and group level data in the *Highlights* section, the district information is descriptive only. Readers should use discretion in drawing conclusions from the data presented.

Statistical Highlights

AGENCIES OF PUBLIC EDUCATION

Central Education Agency

The Central Education Agency, composed of the commissioner of education, the State Board of Education (SBOE) and the TEA, guides and monitors public education in this state.

The SBOE provides leadership and state level administration for Texas public education. The commissioner of education and the TEA staff work closely with the board to implement education policy.

The SBOE is comprised of 15 elected members representing various regions of the state, one of whom is appointed chair by the Governor. A map of the SBOE district boundaries is included in the *End Notes*.

During elections held in the fall of 1990, six incumbent board members were re-elected and one new member, running unopposed, joined the board. Because SBOE district boundaries were redrawn at the time legislative and congressional districts were redrawn, all board positions will be subject to reelection in 1992.

The TEA, located in Austin, Texas, is the administrative unit of the Central Education Agency. Under the management of the commissioner of education, the TEA provides curriculum and technical assistance, accred-

EXHIBIT 1 Enrollment by Campus Type			
<u>Campus Type</u>	<u>Enrollment</u>	<u># of Campuses</u>	<u>% of Total</u>
High School	837,045	1,083	18.1%
Junior High School	190,715	293	4.9%
Middle School	507,722	814	13.6%
Elementary School	1,776,975	3,400	56.7%
Elementary & Secondary Combined	<u>65,861</u>	<u>407</u>	<u>6.8%</u>
TOTAL	3,378,318	5,997	100.1%

Middle and junior high schools make up nearly one-fifth of all campuses in Texas. Middle grade schools bridge the more self-contained, student-centered classrooms of the elementary schools and the more departmentalized, subject-centered classrooms of the high schools. Percents do not sum to 100 due to rounding.

its school districts, operates research and information programs, monitors for compliance with federal and state guidelines, and serves as a fiscal agent for the distribution of state and federal funds. In 1990-91 approximately 1,100 staff were employed at the TEA.

Local School Districts

While the SBOE provides leadership for education, much of the control of public schools remains with the over 1,000 local school districts. Districts may serve students at one or more campuses in grades pre-kindergarten through twelve. There are almost 6,000 public school campuses in Texas, and over half of these serve students in the elementary grades.

EXHIBIT 2 Number of Districts by Type

<u>District Type</u>	<u>Number of Districts</u>
Regular FSP	1,047
Special Statutory	6
State-Administered	11
TOTAL	1,064

The majority of school districts in Texas have locally elected governance boards and are able to tax property within their boundaries.

Exhibit 1 presents counts and enrollments for all campus types. Campuses are typed according to the range of grades they offer. *End Notes* provides more information about the grades offered in each of these categories.

Districts in Texas are classified according to governance structure and the ability to raise local revenue. Counts of districts by type are illustrated in *Exhibit 2* and are defined as follows:

- 1) *Regular Foundation School Program (FSP) Districts*, or districts created under general statutory authority that are eligible for state funding assistance under the Foundation School Program. These districts may also tax property within their geographic boundaries;
- 2) *Special Statutory Districts*, or districts created by a special legislative act but not administered by a state government agency. These districts have no taxable property. Examples are the public schools associated with military bases in the San Antonio area and the Masonic Home in Fort Worth, and;
- 3) *State-Administered Districts*, or districts created by legislative act which are both funded and administered by a state government agency. Most are administered by the Texas Department of Mental Health and Mental Retardation or the Texas Youth Council.

A listing of district assignments to ESC regions is available in the *District Listing* appendix.

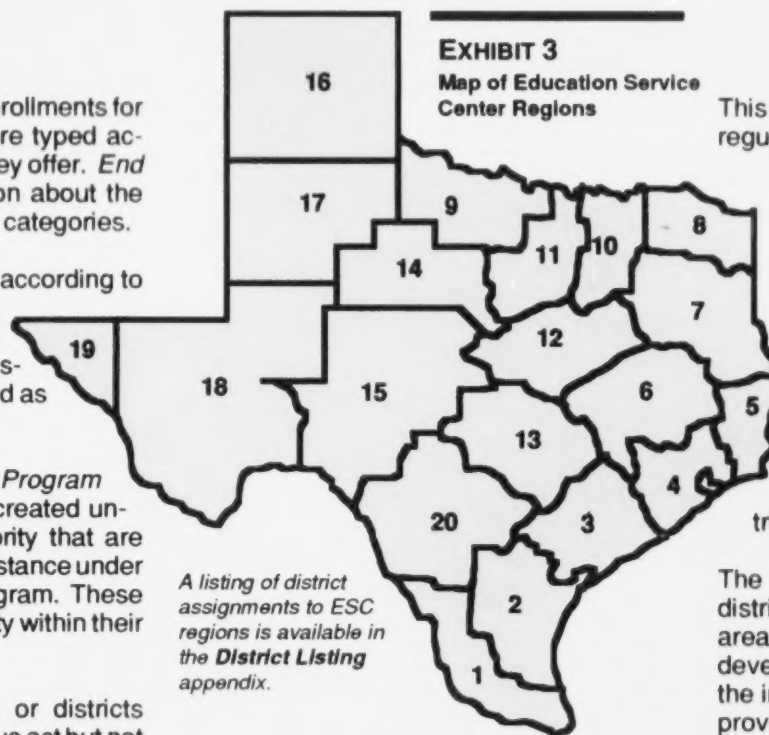

EXHIBIT 3
Map of Education Service Center Regions

This document includes data for the 1,047 regular FSP districts and the 6 special statutory districts only. State-administered districts do not have the same reporting requirements and are not included.

Regional Education Service Centers

The 20 regional ESCs serve the school districts within defined geographic boundaries. Great disparity exists among the ESCs in terms of the number and characteristics of the districts they serve.

The service centers work closely with the districts to provide technical assistance in the areas of accreditation and curriculum, staff development and administrator training, and the implementation of PEIMS. Centers also provide schools with instructional media, data

EXHIBIT 4

				Total	1,053

processing services and assistance in program improvement in areas such as bilingual education, special education, gifted and talented education, and programs for at-risk students.

Exhibits 3 and 4 provide information about the locations and sizes of ESCs. Statistics for all 91 items are available summarized to the regional level in the *Detailed Statistics* section of this document. Additional information about the service centers is available in the ***Biennial Report on Education Service Centers*** published by the agency.

Student Measures

Districts count students several ways. The two types of student counts referenced in this document are enrollment and average daily attendance (ADA).

Enrollment is the number of students enrolled in grades pre-kindergarten through 12 as of

October 26, 1990. The 1990-91 school year marks the first time data reported through PEIMS have been used as the source for enrollment information. Unless otherwise noted, student counts and per pupil amounts presented in this document use the PEIMS enrollment figures.

ADA is a number calculated from attendance information reported by districts for the three six-week periods in the fall and the three six-week periods in the spring. ADA is total attendance for all 36 weeks divided by 175, the number of instructional days. This count, often referred to as full year ADA, is the primary student measure used to allocate state funds. Prior to 1990-91 a different definition of ADA, one based on the averaging of the highest four weeks of attendance out of a total of eight weeks reported, was used.

District Characteristics

The 1,053 regular and special statutory public school districts in Texas range in size from two students in the smallest district to over 194,000 in the largest. The 6 largest districts in the state serve 17 percent of all public school students, while the smallest 393 districts, representing almost 40 percent of all districts, enroll less than 3 percent. See Exhibits 5 and 6.

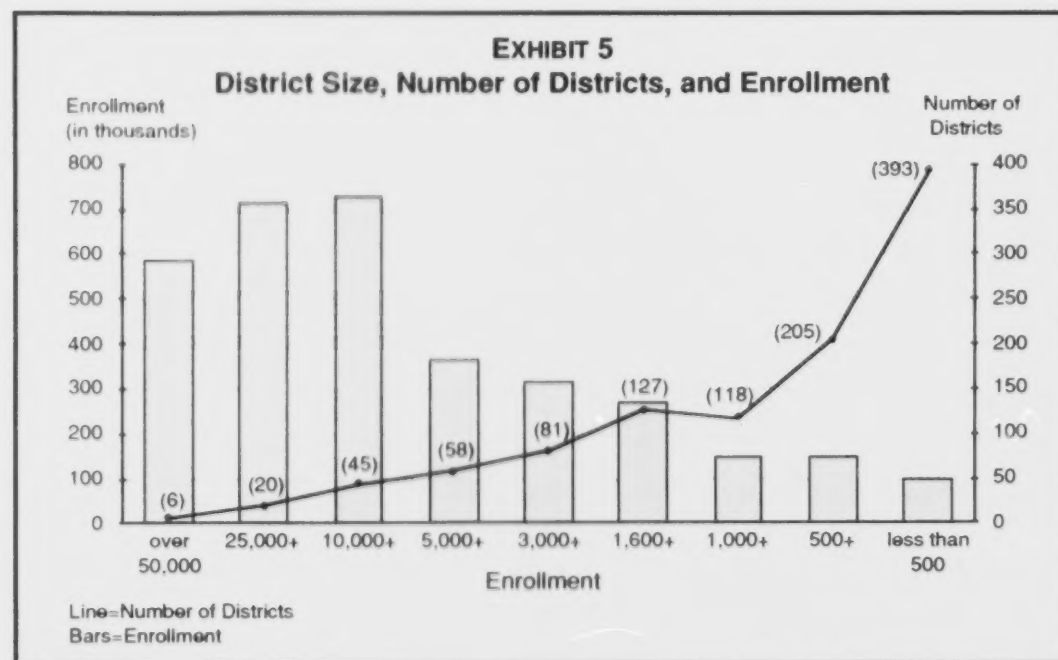

EXHIBIT 6
District Enrollment
at Selected Percentiles

Percentile	Enrollment	
100% (Largest)	194,208	Houston ISD
95%	15,024	
90%	5,619	
75%	2,201	
50% (Median)	775	
25%	322	
10%	135	
5%	87	
0% (Smallest)	2	Allamoore ISD

The ethnic distribution of students also varies greatly across the state depending on the size and community type of the district. Districts in major urban areas serve an almost 80 percent minority student population while districts in rural areas serve a population that is nearly 72 percent white. 1990-91 was the first year that the percent of minority students enrolled in public schools exceeded 50 percent of the total. Minorities now account for 50.5 percent of all students compared with 49.7 percent one year ago.

Student participation in special programs, such as bilingual or vocational education, differs by the community type, district size, and geographic location. A greater percentage of students in rural districts are enrolled in vocational courses — 18 percent compared with 12 percent in major urban districts. By far, the highest percentages of students in

bilingual or English as a Second Language (ESL) have been identified in the Edinburg and El Paso service center regions with 35 percent and 21 percent, respectively. These figures are well above the state average of 8.4 percent.

The differences that exist across the state in terms of district size, the ethnic composition of student populations, and the needs of special population students illustrate the great diversity which can be found among Texas public schools.

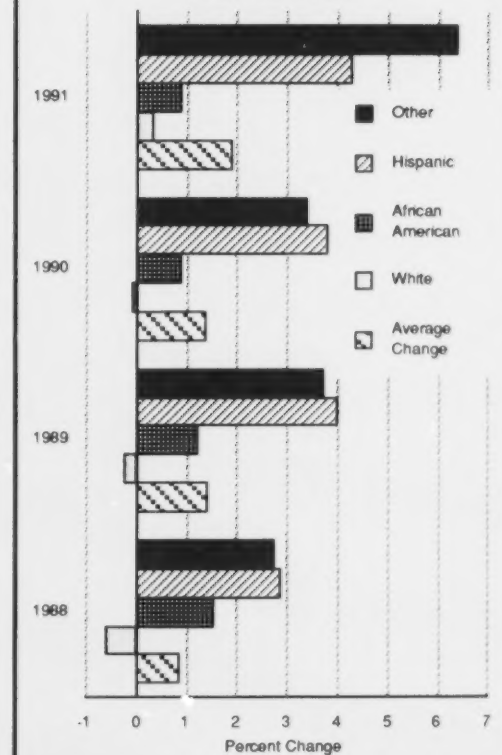

Student Population Growth

During 1990-91 the 1,053 regular and special statutory districts in Texas served nearly 3.4 million students in pre-kindergarten through grade 12. This total represents a 1.86 percent increase from the prior year, a slightly greater rate of growth than the 1.4 percent increase experienced from 1989 to 1990.

Fifty-seven percent of the districts in the state reported enrollment increases in 1990-91. Districts in suburban areas around both major urban and other central cities experienced higher rates of increase, 3.4 percent and 3.7 percent, respectively. Rural districts averaged only a 0.1 percent increase.

In 1990-91 growth in the minority student population averaged 3.4 percent, nearly double the state average. Among minorities Native Americans and Asian/Pacific Islanders grew at the greatest rates, 9.5 percent and 6.2 percent, respectively. These populations now account for 2.2 percent of all

EXHIBIT 7
Year-to-Year Percent Change
in Enrollment by Ethnicity
1988 to 1991

While they remain a relatively small percentage of the total population, the category of "Other" containing Asian/Pacific Islanders and Native American students, exhibited a greater percentage increase than all other demographic groups. The white student population increased for the first time in three years.

students. African Americans grew just under one percent, representing almost 4,400 students. This growth rate appears to be stabilizing; in the late 1980's the rate declined yearly. African Americans now comprise 14.4 percent of the total population.

Although the Hispanic rate of growth, 4.3 percent, is not the highest for an ethnic group, it is the Hispanic population that continues to drive statewide growth because of its much larger size. Of the 61,533 student increase in Texas' total enrollment, 77 percent or 47,387 students were Hispanic. Hispanic students now account for 33.9 percent of the total.

In contrast, the white population grew by only 0.3 percent, or by approximately 5,300 students. Although the rate of increase is small, 1990-91 marks the first year in three years that the total count of white students has not declined. Still, the percent that white students are of the total student population dropped from 50.3 percent in 1989-90 to 49.5 percent this year. See *Exhibit 7*.

Growth by Grade Span

The number of students in the 11th and 12th grades declined again this year as it did in 1989-90, with over 6,800 fewer students in these grades. However, this 1.8 percent loss is not as great as the 3.25 percent student decline experienced in these grades between 1988-89 and 1989-90. This is due in part to a slightly larger tenth grade population from the prior year, but may also reflect successes of dropout prevention programs.

The grade grouping experiencing the greatest increase was the pre-kindergarten and kindergarten group with a surge of over 14,000 new students. Growth in these grades accounts for almost 23 percent of the net increase experienced statewide. Increases in births four and five years prior are the primary cause of these increases.

Texas middle schools and high schools are also dealing with larger numbers of students as the population in the elementary grades ages. Enrollments in grades 5 through 8 are much higher this year with an additional 35,500 students in these grades.

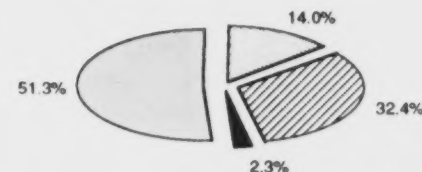

Each ethnic group evidenced approximately the same patterns of growth within grade groups as are exhibited in the statewide patterns. Within each grade grouping, Hispanic students, Native Americans, and Asians/Pacific Islanders have rates of growth at least 1.5 times the state average. White and African American growth lags behind the state average in all grade groups.

In the high school grades, declines in the white and African American populations contributed to an overall decline of 0.3 percent even though the other ethnicities managed combined growth of over 4 percent in these upper grades. Declines in the African American and white populations appear to be the result of relatively low number of births for these ethnicities during the mid-1970's.

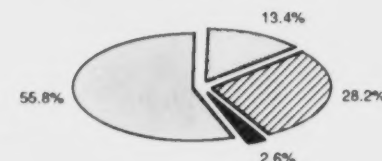

The pre-kindergarten and kindergarten grades have higher percentages of minority students

EXHIBIT 8 Student Populations by Ethnicity

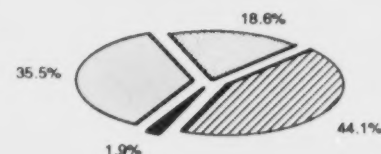

Grade 7-12 Enrollment

High School Graduates

Dropouts

White African American Hispanic Other

Although African American and Hispanic students represent less than half of the population in grades 7-12, they account for nearly two-thirds of all dropouts.

than the state on average; 58 percent versus 50.5 percent statewide. Statutory requirements for pre-kindergarten programs stipulate that Limited English Proficient (LEP) and/or economically disadvantaged pupils are to be identified and served. These characteristics are highly correlated with ethnicity.

In grades 1-6, the ethnic distribution is virtually the same as the state, while the secondary grades (grades 7-12) are slightly more white, 51.3 percent compared with 49.5 percent statewide.

Graduates

In the spring of 1991, 176,363 regular high school students were expected to graduate from Texas public schools. White students accounted for 55.8 percent of all graduates, Hispanic students, 28.2 percent, African American students, 13.4 percent, and other students, 2.6 percent. See *Exhibit 8*.

This count of graduates differs from the definition of graduates used in prior years in that it is an anticipated count rather than an actual count. Not until the fall 1991 submission of PEIMS will actual 1990-91 graduates be reported. The actual count will likely be somewhat lower than this expected figure.

The total number of students expected to graduate is 71.4 percent of all 7th graders enrolled in 1985-86. Although this loss of 71,055 students between the 7th and 12th grades is partially due to outward migration from Texas, a major problem exists with stu-

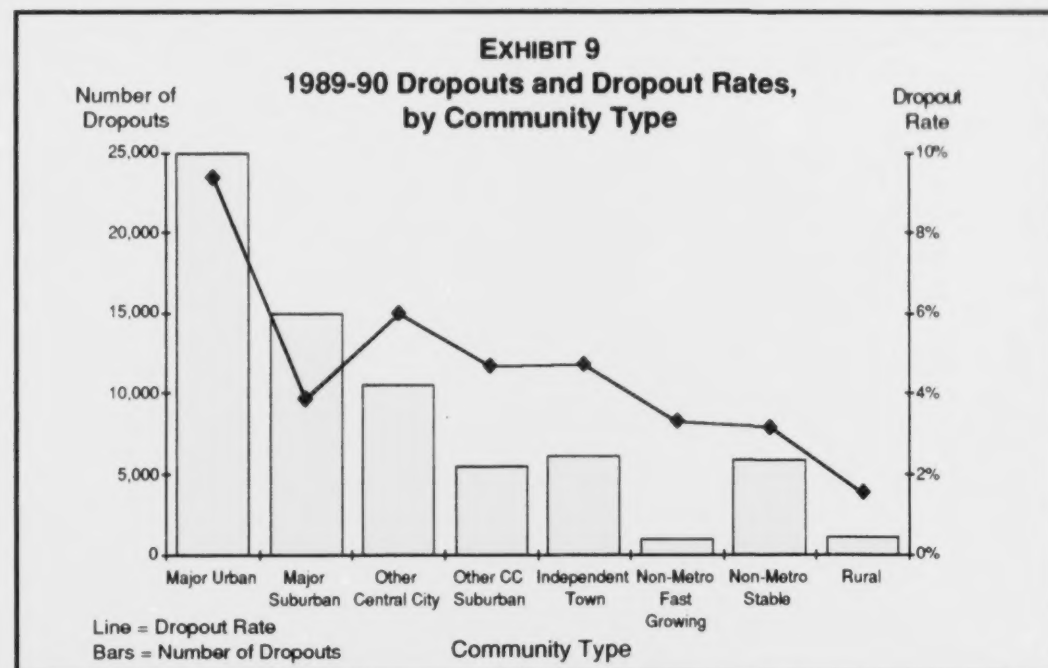

dents dropping out before earning a diploma. At this juncture, the TEA has no count of the number of dropouts who later return to school or complete a GED.

Dropouts

School districts reported a total of 70,040 dropouts in grades 7 through 12 for the 1989-90 school year, representing an annual statewide dropout rate of 5.1 percent or an esti-

mated longitudinal rate of 27.2 percent. Urban districts and districts with high percentages of minority students exhibit the highest dropout rates. *Exhibit 9* depicts the relationship between community type and dropout rates.

A student who dropped out typically was male (55 percent) although there is some variation in the distribution by sex within grade level. Within grades, the highest percentage of male

Dropouts are concentrated in the state's urban school districts. Nearly 36 percent of all dropouts are in the 8 districts classified as major urban.

dropouts occurs in the 9th and 10th grades with 57 percent and 55 percent male dropouts, respectively.

Of the total, almost 60 percent dropped out during the regular school year as opposed to over the summer. The largest percentage of dropouts left school in the 9th and 10th grades (30 percent and 22 percent, respectively). It is estimated based on the students' birth dates that over 72 percent of dropouts were at least one grade level behind in school. See *Exhibit 10*.

Among the Asian/Pacific Islander population of 7th through 12th graders, 3.9 percent dropped out. For white students that figure was 3.5 percent; for African Americans, 6.7 percent; for Hispanics, 7.2 percent; and for Native Americans, 9.0 percent. Refer to *Exhibit 8* for a breakdown of the ethnicities of the total 7th through 12th grade student population compared with graduates and dropouts.

TOTAL	70,040	38,249	31,791	6,570	18,131	50,607

These characteristics of dropouts are among the most frequently requested from the Texas Education Agency. For more detailed information on dropouts see the Report on 1989-90 Public School Dropouts from the State Board of Education October 1991.

STUDENT PERFORMANCE

Texas Assessment of Academic Skills

The Texas Assessment of Academic Skills (TAAS) testing program was administered for the first time in October 1990 to almost 1.2 million students in grades 11, 9, 7, 5, and 3.

This testing program, as its name implies, emphasizes the assessment of academic skills rather than minimum skills. Previous testing programs in Texas, the Texas Assessment of Basic Skills (TABS) implemented in 1980 and the Texas Educational Assessment of Minimum Skills (TEAMS) begun in

1985, measured minimum basic competencies. The TAAS program focuses on the student's higher order thinking and problem-solving skills.

TAAS, like TABS and TEAMS, measures student achievement in the areas of reading,

writing, and mathematics. In the future, however, TAAS will expand the scope of content eligible for testing to include more of the instructional targets delineated in the essential elements. By the 1994-95 school year, TAAS will include assessment of student achievement in science and social studies.

Various measurements can be used to interpret test results, but the measurement reported in this document is the percent of students passing the test taken. The percent passing is variously shown as:

- the percent passing each subject for each grade;
- the percent passing all tests taken for a specific grade;
- the percent passing all tests taken for a specific ethnic group; or
- the passing rate for all subjects and all grades.

In 1990-91, students in grades 3 and 5 were required to correctly answer 65 percent of the test questions in order to pass. In grades 7, 9, and 11 students answering 60 percent of the test questions correctly were counted as passing. Beginning with tests administered in 1991-92, the passing standard was raised to 70 percent for all grades.

As shown in *Exhibit 11*, among the grades tested, the percent passing all tests taken is lowest in grades 7 and 9 with passing rates of 48 percent and 49 percent, respectively. The highest passing rate for all tests taken is in grade 11 with almost 66 percent. Statewide,

approximately 56 percent of the students tested passed all the tests they took.

The subject area with the highest passing rate varies by grade. For example, in grades 9 and 11, more students passed reading than mathematics or writing. In the 5th and 7th grades more students passed writing, while in grade 3, for both the Spanish and English versions of the test, higher percentages of students passed mathematics.

Significant disparities in performance exist among the major ethnic groups in Texas. In

grade 11, 46 percent of African American students and nearly 53 percent of Hispanic students passed all tests taken compared with 77 percent of white students and 74 percent of students of other ethnicities. Similar patterns exist in the other grades tested. Progress toward closing this gap is one objective of the State Board of Education outlined in the *Long-Range Plan for Public Education*. Examination of future TAAS scores by ethnic group will reveal whether progress has been made toward this objective.

EXHIBIT 11
Percent of Students Passing TAAS by Grade and Subject

<u>Grade</u>	<u># Students Tested</u>	<u>% Passing All Tests Taken</u>	<u>% Passing Math</u>	<u>% Passing Reading</u>	<u>% Passing Writing</u>
3rd - Spanish	11,413	38.7%	73.2%	66.9%	45.3%
3rd - English	230,521	64.9%	86.9%	84.8%	71.0%
5th	233,034	53.2%	61.8%	69.7%	81.1%
7th	222,503	48.0%	62.9%	60.4%	73.8%
9th	235,380	49.2%	59.1%	77.8%	68.0%
11th	<u>170,333</u>	<u>65.7%</u>	<u>75.5%</u>	<u>88.3%</u>	<u>81.6%</u>
TOTAL	1,103,184	55.5%	69.0%	75.6%	74.5%

Like its predecessors, TAAS is a criterion-referenced test that relates test items to specific learning objectives. The objectives in TAAS are drawn from the essential elements established by the State Board of Education. Passing rates shown were calculated using the passing standards of 65 percent for grades 3 and 5, and 60 percent for grades 7, 9, and 11. All counts of special education students and their scores have been excluded from the results for all grades.

Districts must offer remediation to students failing to attain mastery in a subject area. In grades 3 through 11, almost 535,000 students, or approximately 46 percent of all students tested, will require some remediation. This figure is much higher than the approximately 275,000 students in 1989-90 (28 percent) who required remediation due to failing TEAMS tests. The state compensatory allotment supports this remediation; it is allocated on counts of economically disadvantaged students, however, not the number of students requiring services.

Students failing to pass the grade 11 test, or exit test, are not eligible to receive a Texas high school diploma. Among juniors taking the October 1990 TAAS exit test almost 62,000, or 35 percent, failed one or more of the subject areas. These students will have three more opportunities to master the exit level TAAS test before the end of their senior year.

Because this is a transition year between the TEAMS and TAAS programs, some 11th and 12th graders were eligible to take the TEAMS exit test instead of the TAAS. The TEAMS exit test was administered in October 1990 and again to seniors in April 1991. By the close of the 1990-91 school year, approximately 4,400 seniors had failed to pass the exit test they took (either TEAMS or TAAS) and were therefore ineligible to graduate. Texas has no certificates of completion for these students.

Group information in the *Detailed Statistics* section shows that TAAS scores tend to be higher in major suburban districts and lower in large, urban districts. Districts with higher percentages of low income students have lower passing rates, regardless of subject area or ethnic group. The two-volume TEA publication ***Texas Assessment of Academic Skills: Student Performance Results, October 1990*** is available for more information.

College Admissions Tests

Of Texas high school seniors graduating at the end of the 1989-90 school year, over 78,000 (42 percent) took the Scholastic Aptitude Test (SAT) of the College Board's Admissions Testing Program and over 49,000 (26 percent) took the ACT component of the American College Testing Program.

The SAT consists of verbal and mathematics components, whereas the ACT includes tests of reading and science reasoning in addition to English and mathematics. Scores on the verbal and mathematics sections of the SAT range from 200 to 800 and sum to the SAT total score. That score, therefore, ranges from 400 to 1600. Each subject area component of the ACT has a score ranging from 1 to 36; the composite is the average of these four scores. Since October 1989, a revised ACT, the Enhanced ACT Assessment, has been administered. Previously reported ACT scores are not comparable to the Enhanced ACT scores reported here for 1989-90 be-

cause the scale ranges from the original ACT also were revised for the Enhanced ACT.

Texas average scores on both the SAT and ACT fall below the national averages. For the SAT, Texas scores are 18 points lower—872 compared with 900. For the ACT, the comparison is 19.8 to 20.6. On the SAT, the differential is largest in mathematics. See *Exhibit 12*.

EXHIBIT 12 SAT and ACT Scores for 1989-90 Seniors for Texas and the Nation

	Texas Public <u>School Graduates</u>	All U.S. <u>Graduates</u>
SAT		
Verbal	411	424
Mathematics	461	476
Total	872	900
ACT		
English	19.7	20.5
Mathematics	19.3	19.9
Composite	19.8	20.6

Because 1989-90 was a transition year for the ACT, not all students tested took the new version of the test. Because the number of students taking the new Reading and Science Reasoning portions of the test are not representative of all students tested, scores for these components are not shown for either Texas or the nation.

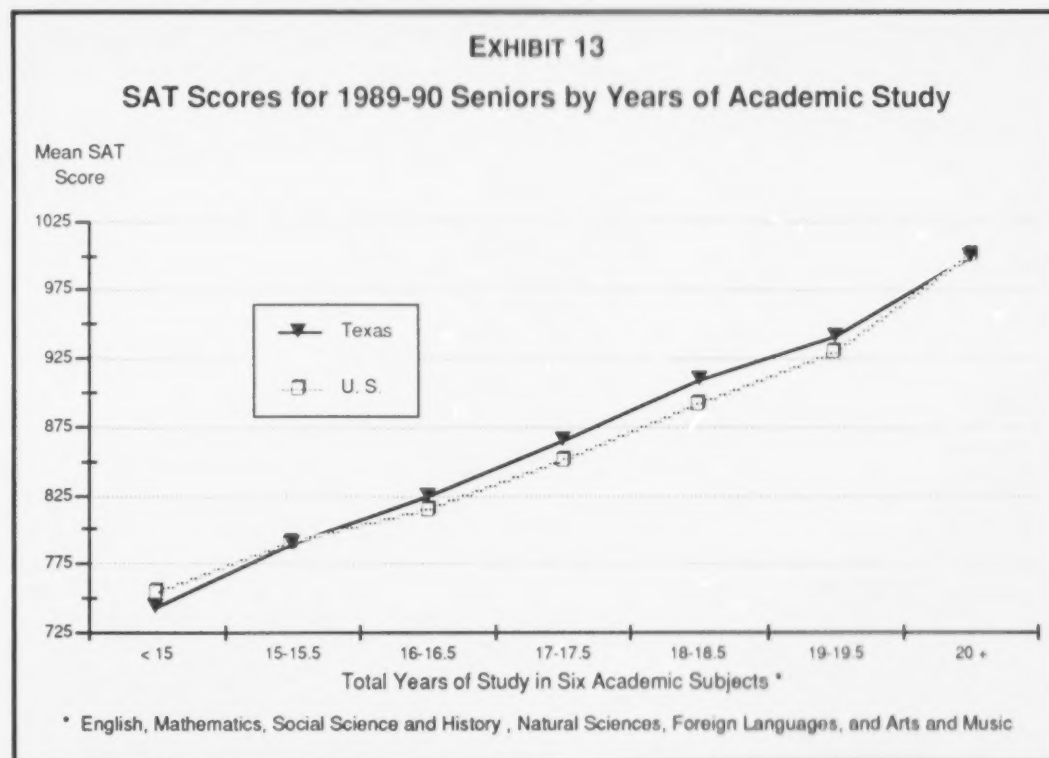

Students taking the SAT reported information on academic preparedness, parental education, and income. Students' SAT scores tended to increase with increasing numbers of academic courses completed, higher levels of parental education, and higher levels of parental income. Similar relationships existed with ACT test score results. *Exhibit 13* shows the relationship between years of study in academic subjects and SAT total scores.

The lower level of academic preparedness also offers one possible explanation for the lower SAT and ACT test scores exhibited by African American, Native American, and Hispanic students compared with the higher scores of white and Asian students. On average, white and Asian students tended to complete greater numbers of academic courses than students in the other ethnic groups.

On both the SAT and ACT, males scored higher on average than females. Although females achieved higher scores on the English component of the ACT, the higher mathematics scores obtained by males offset this edge. One explanation for the differences between male and female scores relates to the rigor of the academic courses they took. Disproportionately more males than females enroll in advanced science courses such as chemistry and physics, and mathematics courses such as geometry, trigonometry, and calculus.

School district characteristics also showed some relationships with the ACT and SAT scores attained. In general, the scores increase the wealthier the district or the lower the percentage of students classified as low

income. In Texas, on average, greater percentages of seniors in urban and suburban districts took the SAT while greater percentages of seniors in rural districts took the ACT.

For both Texas and the nation, test scores rise with academic preparedness. Given comparative levels of preparation, Texas scores equal or slightly exceed the national totals. Since the mean SAT scores for Texas are lower than those of the nation, this means students in Texas take fewer years of academic units on average than do students nationwide.

DISTRICT STAFF

School district staff include professionals, educational aides, and auxiliary staff. Professional staff are teachers, central and campus administrators, and professional support staff such as supervisors, counselors, and librarians. Professional staff full-time equivalent (FTE) counts increased 2.6 percent and average base salaries increased 3.8 percent for

professionals since the fall of the 1989-90 school year.

Staff Counts

As illustrated in *Exhibit 14*, teachers comprise the largest single category of staff. They account for 84 percent of professional staff and 53 percent of all staff. Teacher FTEs in 1990-91 are 2.8 percent higher than 1989-90 counts. This rate of growth is one and one-half times the 1.86 percent increase exhibited in the student population. Greater rates of teacher growth are due in part to greater student growth in the elementary grades where class sizes tend to be smaller than at other grade levels.

Among other professionals, support staff showed the most growth, 4.75 percent. Although this rate of growth is less than their prior year growth of almost 7 percent, support staff account for a slightly greater percentage of all employees, 5.4 percent compared with 5.3 percent in 1989-90. In contrast the rate of growth among administrators

declined between 1989-90 and 1990-91 by almost 2.0 percent. Administrators now comprise 4.4 percent of all staff; down from 4.6 percent in 1989-90. Closer examination of administrator counts reveals a significant number of staff previously classified as administrative officers were reported in 1990-91 as professional support staff. Administrators and support staff considered together increased by 1.7 percent over 1989-90.

Counts of educational aides increased by 4.4 percent, while auxiliary staff, the second largest single group at 29 percent, decreased by 0.6 percent. Auxiliary staff include bus drivers, maintenance workers, and cafeteria workers.

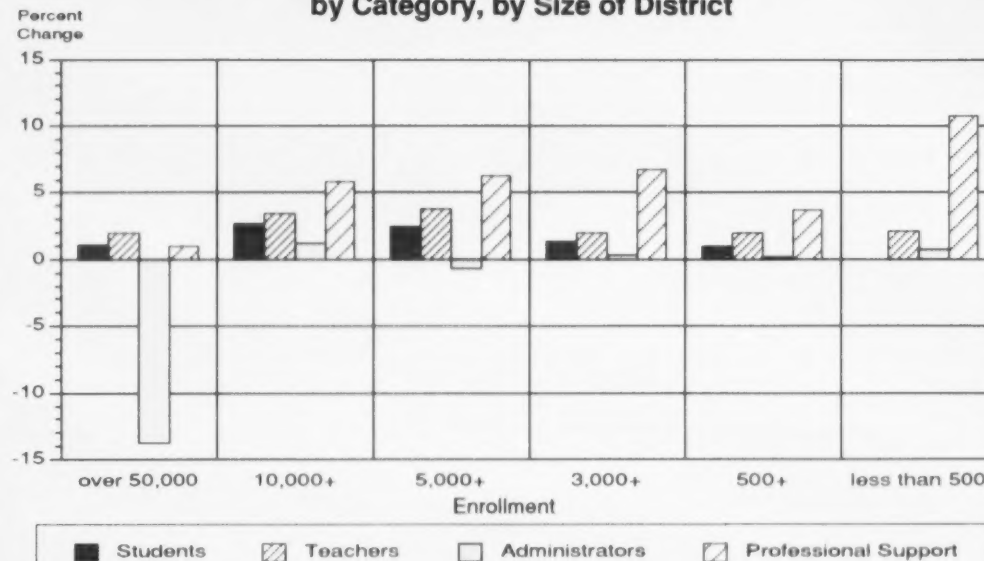

Districts with between 5,000 and 10,000 students experienced the greatest growth in the combined professional categories, 3.7 percent, while the six largest districts in the state, those with over 50,000 students, showed only a 0.7 percent increase in professional staff. This low rate of growth in these districts is primarily due to significant declines in administrative staff. Professional support staff in these six districts increased 1.0 percent from the prior year.

EXHIBIT 14
District Staff by Category

Category	FTEs	Percent of Total	Average Salary Base Pay Only	Average Salary (Including Supplemental)
Teachers	205,832	52.8%	\$26,840	\$28,321
Campus Administrators	10,621	2.7%	\$42,167	\$42,450
Central Administrators	6,490	1.7%	\$47,384	\$47,506
Professional Support	21,240	5.4%	\$32,522	\$32,766
TOTAL PROFESSIONALS	244,183	62.6%	\$28,547	\$29,832
Educational Aides	31,208	8.0%	\$10,405	\$10,442
Auxiliary Staff	114,813	29.4%	\$12,843	\$12,843
TOTAL STAFF	390,204	100.0%	\$22,475	\$23,282

See Exhibit C in the *End Notes* for a list of positions assigned to each of these categories. Supplements are amounts paid in addition to an employee's base salary and include such things as career ladder, athletics, club sponsorships, and band or orchestra.

EXHIBIT 15
One Year Change in Professional Staff Counts
by Category, by Size of District

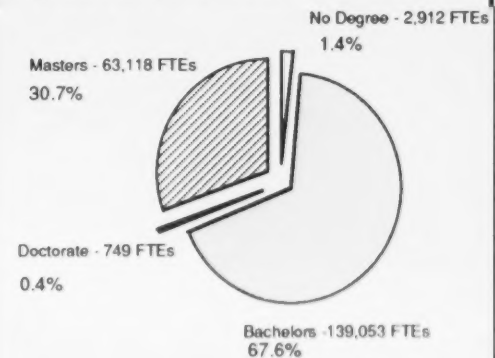

"Administrator" includes positions such as superintendent, principal, business manager, and administrative officer while "Professional Support" includes therapists, psychologists, counselors and social workers, physicians and nurses, and librarians. At least part of the apparent decrease in administrative staff is the result of reclassification of some individuals. Many staff classified as administrative officers in 1989-90 were reported as professional support staff in 1990-91.

Patterns of growth in the teacher population reflected student growth. On average, the teaching force grew in all categories of district size at rates exceeding student growth. The smallest districts exhibited the greatest rates of increase in professional support staff. See Exhibit 15.

Approximately 33 percent of all staff employed in Texas public schools are minorities: 21 percent Hispanic, 11 percent African American, and 0.5 percent Asian/Pacific Islander and American Indian. Among teachers, minorities account for 22 percent.

EXHIBIT 16
Highest Degree Held for Teachers

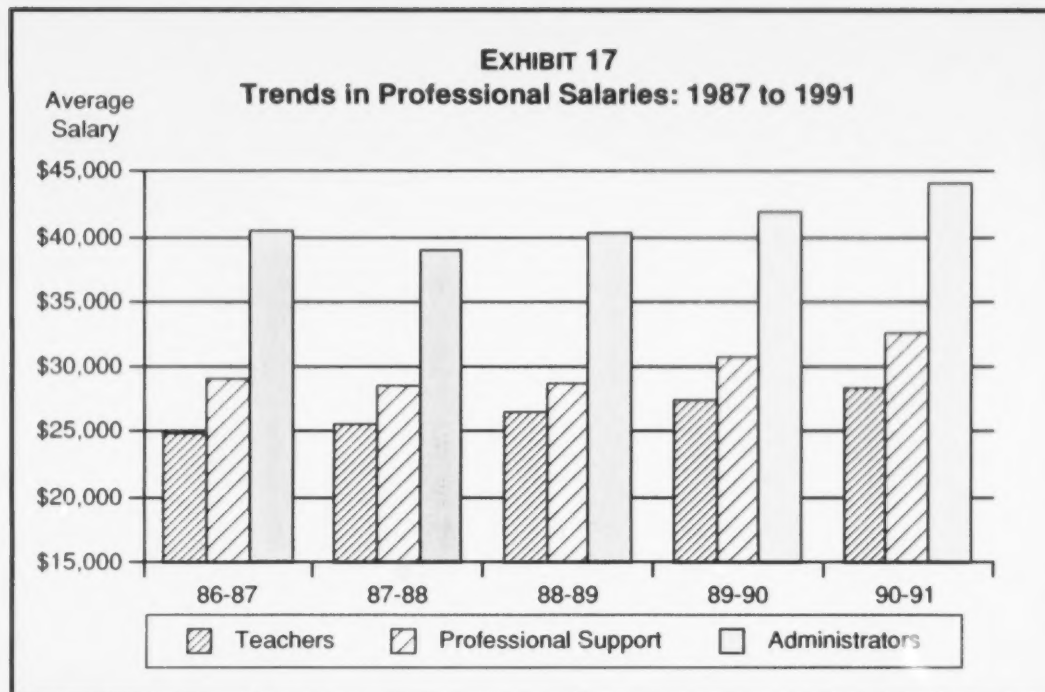

Generally, teachers with no degree are instructors of vocational education courses where significant experience is a primary qualification for the job. These teachers gain certification through alternative certification programs. Percents do not sum to 100 due to rounding.

Teacher Experience and Education

A bachelor's degree is the highest degree earned by most Texas teachers, nearly 68 percent. An additional 31 percent have earned master's or doctorate degrees. Approximately 1.4 percent, primarily vocational education teachers, are reported as having no degree. See Exhibit 16.

The average teacher in 1990-91 has 11.3 years of total teaching experience. Tenure, or longevity within a particular district, aver-

Salaries reflect base pay only for professional support and administrative staff. Teacher salaries include career ladder supplements for all years shown. Administrators include both campus and central administrators.

ages 7.6 years. These averages have varied only slightly over the past few years.

Permits

Teachers, counselors, principals, and certain administrators must either have earned the appropriate certification or be granted one of five types of permits in order to perform their duties. For a non-certified person to teach,

for a teacher to undertake counseling or administrative duties, or for a teacher to teach out of field, a permit must be acquired.

The TEA must authorize the nonrenewable permit, emergency teaching permit (ETP), special assignment permit (SAP), and vocational permit. A district superintendent may authorize the temporary classroom assignment permit (TCAP) for a teacher to teach more than one class out of field.

The summary of item 49 presented in the *Detailed Statistics* section shows that statewide 4.2 percent of teachers hold an active permit of some type, approximately the same percent indicated in the previous two years.

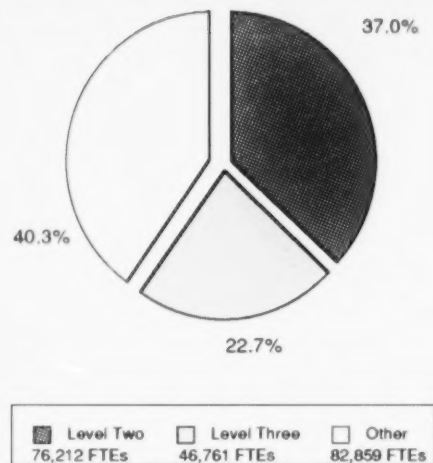

Professional Salaries

Professional base salaries grew 3.8 percent since the fall of the 1989-90 school year to \$28,547. Total salaries, including reported supplements, climbed to \$29,832, a 3.4 percent increase. Supplements are amounts paid in addition to the base salary contracted for an employee's regular duties. Supplements are paid for such things as career ladder, athletics, club sponsorships, and band or orchestra. Many factors affect these statewide average increases, including the mix of experienced and inexperienced staff and the level of inflation that districts recognize when increasing their salary schedules.

Teacher total salaries increased by 3.0 percent, to \$28,321. On average, support staff earn \$32,766, central administrators, \$47,506, and campus administrators \$42,450. Support staff salaries exhibited the greatest percent increase, nearly 5.9 percent, closely followed by administrative total salaries with a 5.4 percent increase. *Exhibit 17* depicts trends in professional salaries since 1986-87.

Analysis of salary increases by size and type of district indicates the greatest increases occurred in large, urban districts. This contrasts with 1989-90 when greater increases

EXHIBIT 18
Teachers on the Career Ladder

Data from the fall of 1990 indicate that nearly 60 percent of teachers receive recognition and salary supplements through the career ladder. The 83,000 teachers not on Level 2 or 3 are either on Level 1 or were reported with no Career Ladder assignment. Teachers on Level 1 are not eligible for supplements.

occurred in small, rural districts. That year, smaller districts were forced to increase salaries in order to meet new mandates which raised the minimum beginning salaries of professional staff from \$15,200 to \$17,000. This year, growth of teacher base salaries in these smaller districts averaged 3.5 percent compared with growth of 6.2 percent last

year. Teacher base salaries in the six largest districts increased 4.2 percent on average this year compared with 2.8 percent a year ago. The gap between salaries in urban versus rural settings is widening again.

Teacher Career Ladder

A career ladder for teachers was mandated by the legislature in 1984 and first implemented in the 1984-85 school year. The system was initiated to reward excellence in the teaching field and to attract talented students to the teaching profession by raising the compensation level.

The career ladder has four levels; however, as of the 1990-91 school year only levels one, two, and three have been implemented. Placement decisions are made by the employing district and are based on job performance, education, and years of experience.

Teachers meeting specified performance standards and placed on levels two or above are eligible to receive salary supplements. State law establishes the range for these supplements and the state allots each district money for the career ladder on a per student basis. In 1990-91 districts received \$90 for each student in average daily attendance to be used to supplement the salary of each teacher above level one.

In 1990-91 the ranges for supplement amounts for teachers on level two were \$1,500 to \$2,000; and for teachers on level three, \$3,000 to \$4,000. Estimates of the average supplement amounts paid in this year are \$1,649 and \$3,196 for levels two and three, respectively. These estimates are based on the total supplement amounts reported for teachers placed on levels two or three. Districts report supplement amounts for only about 32 percent of the teachers identified as being on levels two or three. See Exhibit 18.

FINANCES

Financial information in this document represents district budgeted amounts as of October 1990. Actual financial information is reported for similar items but is generally available more than a year later than are budgeted data.

Texas public school districts use a uniform accounting system to record revenues and expenditures. Revenues are recorded by fund and object; expenditures by fund, function, and object. Additionally, expenditures relating to instruction must be accounted for by program. Examples of programs are the regular, special, vocational, and bilingual education programs.

COOPERATIVES

Some districts participate in cooperative arrangements with other districts. The fiscal agent, or manager of the cooperative may be another district, an ESC, or a county.

One of the most common types of cooperatives is a special education cooperative, where special education services are shared among member districts. An indicator is shown in the *District Detail* for each district that participates in, or is a fiscal agent of, a special education cooperative.

These districts may have per pupil expenditure amounts which differ from expectations because students served through the fiscal agent are not necessarily enrolled in the fiscal agent district. To correct for this problem, any amounts budgeted in fund group 80, fiduciary fund types, have been excluded from the figures shown in this document. Total revenues and expenditures reported in fund group 80 are approximately \$83.7 million and \$100.5 million, respectively.

Another case where per pupil expenditures may be misleading occurs when districts pay tuition to another district for pupils they do not serve. A characteristic some of these districts share is that they do not have a high school. (Item 3 in the *District Detail* indicates when this occurs.) Expenditures budgeted for tuition transfers have been excluded from the

financial information presented in this edition of *Snapshot*. See the *End Notes* for further details.

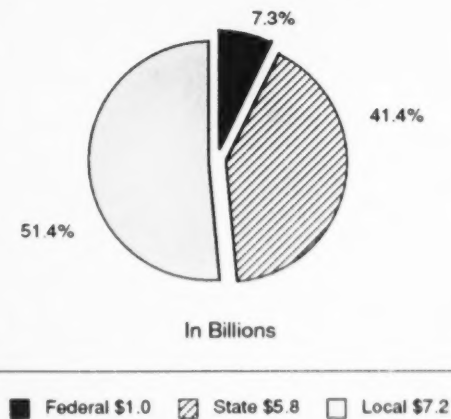

REVENUES

School districts receive operating funds from three major sources: local, state, and federal. In 1990-91, the total amount of revenues budgeted by local school districts was \$14 billion, not including revenue raised for capital construction through the issuance of debt. This represents an increase of 9.9 percent over 1989-90.

Local funds comprise 51.4 percent of total revenues. This percentage is slightly lower than the nearly 53 percent attributable to local funds in 1989-90. The vast majority of these local funds, 90 percent, are from local property taxes. In 1990-91 state revenues accounted for 41.4 percent of all revenues, an increase of 1.2 percent over last year. Federal revenues also increased as a percentage of the total, to 7.3 percent. See *Exhibit 19*.

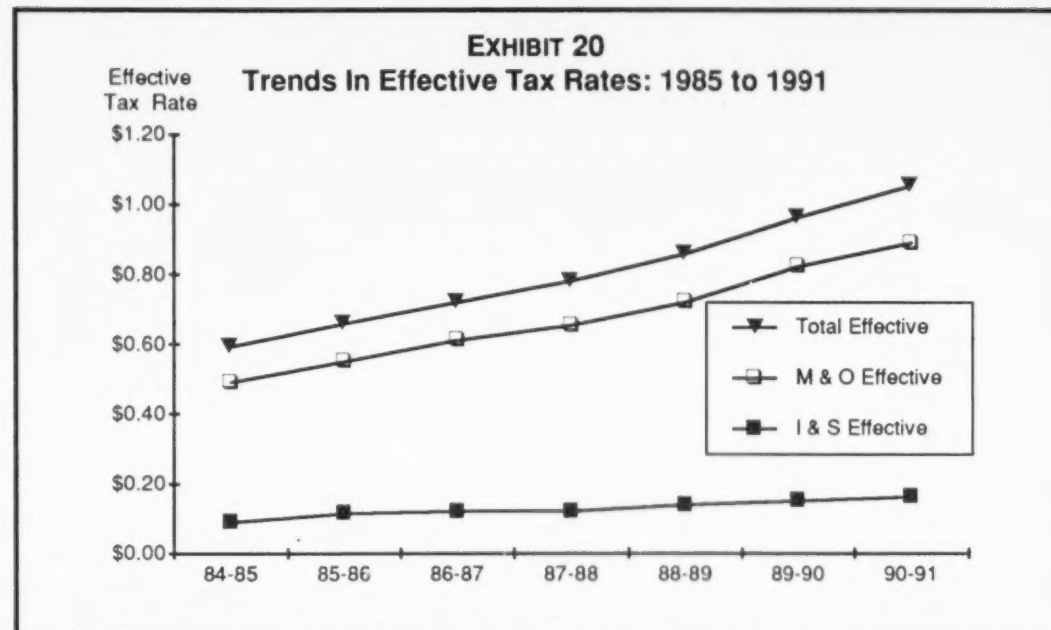

The greater gains exhibited in state revenues between 1989-90 and 1990-91 mark the end of a five year trend in which local revenues as a percent of the whole had been increasing steadily. The local portion rose from a low of 48 percent in 1984-85 to a high of nearly 53 percent in 1989-90. Conversely, the state

EXHIBIT 19
Revenue by Source

District budgeted revenue from all funds (except the capital outlay fund) is apportioned by source. Debt service funds are almost entirely generated from local sources, which has an impact on this distribution.

portion had steadily decreased from a high of 46 percent in 1984-85 to a low of 40 percent last year. The increase in the percent of state funds in 1990-91 is due to an additional \$0.5 billion injected into the system as a result of Senate Bill 1, 71st Legislature, Sixth Called Session. This boost of state funds stabilized the decline of the state share and represents

School district tax rates continue to increase, driven by falling property values, a growing student population, and in recent years, by legislative incentives for districts to raise their tax effort to receive state equalizing funds.

the first major influx of state funds since House Bill 72 in 1984-85.

In any single district, the composition and level of revenue sources may vary substantially from the state average depending upon local wealth and qualifications for federal assistance.

Local Funds

Local funds for public education are raised primarily through the local property tax. Taxes are levied against locally assessed property rolls to generate revenue. All tax rates shown in this publication are effective tax rates, calculated using the market value estimates

of property from the State Property Tax Board (SPTB). Locally adopted rates are not used for inter-district comparisons because they do not control for variation in local appraisal practices.

Districts set two tax rates each year, one for maintenance and operations (M&O) and another for debt service, called the interest and sinking fund rate (I&S). M&O tax rates are subject to a statutory maximum of \$1.50 per \$100 assessed valuation. If the amount of taxes levied in a given year exceeds the preceding year's levy by eight percent, voters may petition for a tax roll back election. I&S tax rates are not subject to the same limitations as those for current operations.

Increases in local tax effort have been dramatic during the last decade. The total effective tax rate has risen from \$0.59 per \$100 valuation in 1984-85 to \$1.045 in 1990-91, a 77 percent increase in six years. See Exhibit 20. Well over half the districts in the state (61 percent) now have total effective rates over \$1.00, compared with only 45 districts (4.2 percent) with rates of this magnitude six years ago.

Factors contributing to increased local effort include falling property values, an increasing student population, and incentives in recent legislation for districts to boost their effort in order to receive state equalizing funds.

Taxable property values in 1990-91 totalled \$630 billion, approximately \$1 billion less than in 1989-90 and over \$72.1 billion less than they were at their peak in 1985-86. The rate of property value decline has been diminishing in recent years; taxable values for the 1991-92 school year are not expected to exceed the 1990-91 values.

Given falling property values, districts must tax at higher rates in order to generate the same levy amount as in prior years. This, coupled with more students to serve, means districts must tax even higher to generate the same levy amounts per pupil.

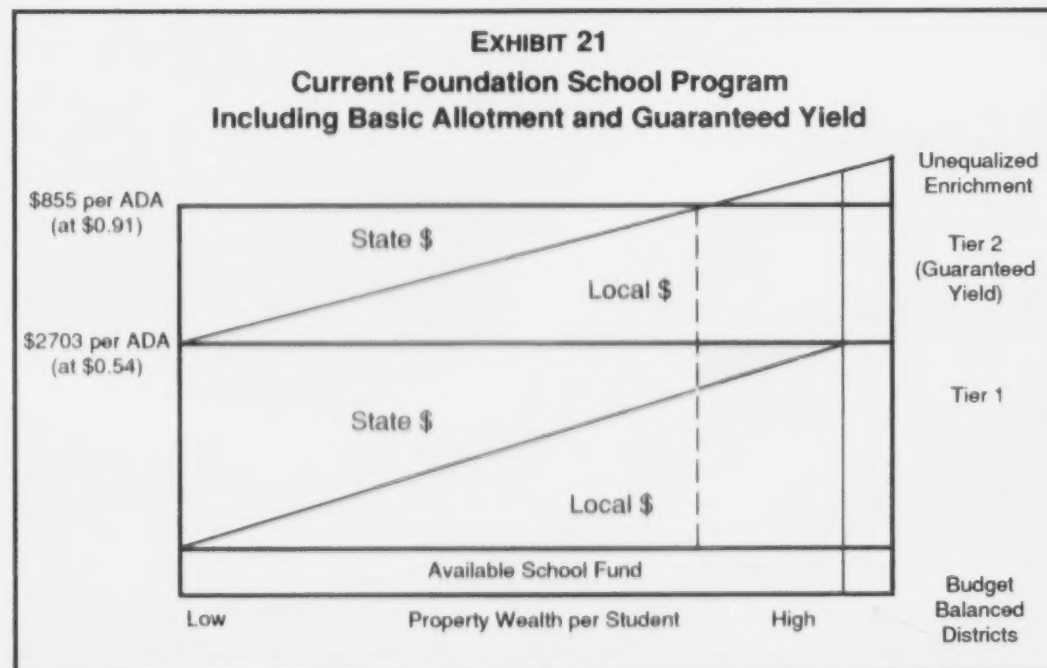

State Funds

State funds for public education in Texas are distributed through a system of formulas known as the Foundation School Program (FSP). The FSP is a financing system made up of a series of allotments designed to ensure that each school district can provide instructional programs suitable to meet the minimum educational needs of its students.

Allotments are calculated using various student counts. These include ADA, head counts based on identified characteristics, and full-time equivalent counts modified by program or instructional arrangement weights. The actual payment of state funds is based primarily on the property tax base of the school

district. Historically, the tax effort of the school district has been less important in determining the level of state aid a district received.

In 1989 and 1990, the Foundation School Program underwent significant revision during the 71st session of the Texas Legislature in response to the *Edgewood v. Kirby* court

The current FSP reflects changes made by SB 1, during the 71st Legislature, Sixth Called Session including an increase in enrichment through the guaranteed yield. Maximum state aid in tier 2 occurs at a lower district wealth amount than maximum state aid in tier 1. Districts with wealth greater than the point indicated by the broken line receive some state aid in tier 1, but no state aid in tier 2. In districts with wealth that exceeds \$179,000 per weighted pupil, a penny of tax revenue generates more than \$17.90 per student resulting in unequalized enrichment. This is money raised through local property taxes that is unmatched by state funds.

case. Changes made as a result of Senate Bill 1019, 71st Legislature, Regular Session, were implemented with the 1989-90 school year. Additional changes were made to the Foundation School Program for the 1990-91 school year in Senate Bill 1, 71st Legislature, Sixth Called Session.

With the start of the 1990-91 school year, the basic allotment, or the base amount provided by the state for each pupil in ADA, was increased from \$1,477 to \$1,910. Prior to the 1989-90 school year, a district's basic allotment calculations were unaffected by whether or not the district raised its share of the FSP, called the local fund assignment (LFA). Beginning with the 1989-90 school year, in order to qualify for state aid districts had to raise their LFA by taxing at a minimum rate of \$0.34 per \$100 valuation. For the 1990-91 school year, the minimum rate necessary to qualify for state funding rose to \$0.54 per \$100 valuation.

A few wealthy districts, representing approximately four percent of the state's students, receive no state aid and are not required to raise their LFA. These districts, known as budget balanced districts, receive only the constitutionally provided Available School Fund allotment for their students.

The FSP revised by Senate Bill 1 retained the guaranteed yield program begun in 1989-90 to provide additional funds to districts. This

level of financing, often referred to as the second tier, enables low wealth districts to earn additional state funds by setting their tax rate above the LFA level.

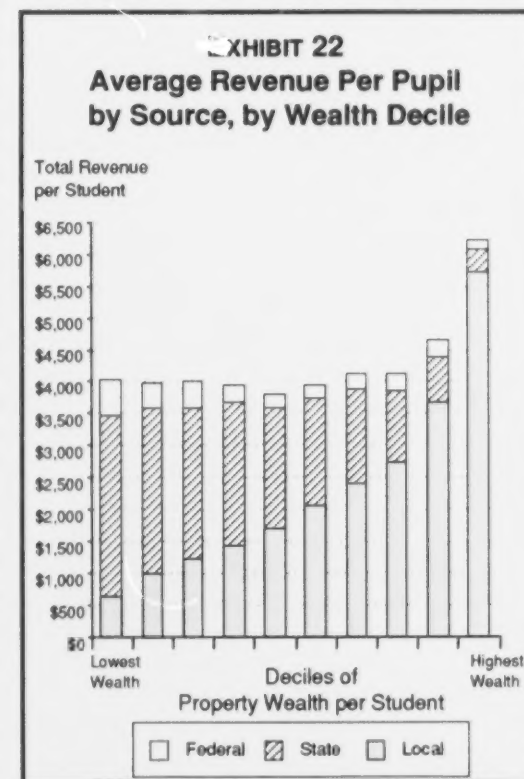

For each penny of tax effort the district levies above the LFA requirement, up to an additional \$0.37 (for a total tax rate of \$0.91) the state will guarantee a yield of \$17.90 per penny, per weighted student. The maximum guaranteed yield amount for 1990-91 averages \$855 per ADA. The effect of a guaranteed yield program is to increase the tax base available to property poor school districts.

Exhibit 21 illustrates the relationship between district wealth and state funding for both the basic allotment and guaranteed yield tiers of the Foundation School Program. In both tiers poorer districts receive a larger percentage of their revenue from the state while wealthier districts fund their operations with a greater percentage of local funds.

Like *Exhibit 21*, *Exhibit 22* shows the inverse relationship between wealth and state aid. It also highlights the fact that the local effort of the wealthiest group of districts generates more revenue than the combined state, local, and federal amounts of the poorer groups. In the remaining 90 percent of districts however, total revenue per pupil does not vary substantially due to wealth because of the FSP structure.

Federal Funds

Almost all federal funds are appropriated by Congress for specific programs or specific populations of students. These funds must be expended for the designated purposes.

The FSP is designed to deliver proportionately more funds to those districts less able to generate local funds. Approximately 10 percent of the districts in the state are represented by each bar on this graph.

The majority of these federal funds must be spent to supplement programs already in place, not to relieve the state of its financial obligation to provide programs which address the needs of special students. Often, the federal appropriations reserve portions of each state's allocation for both local and state use. The portion of the state's allocation to be spent by local school districts is distributed on a formula basis. The remaining allocation is

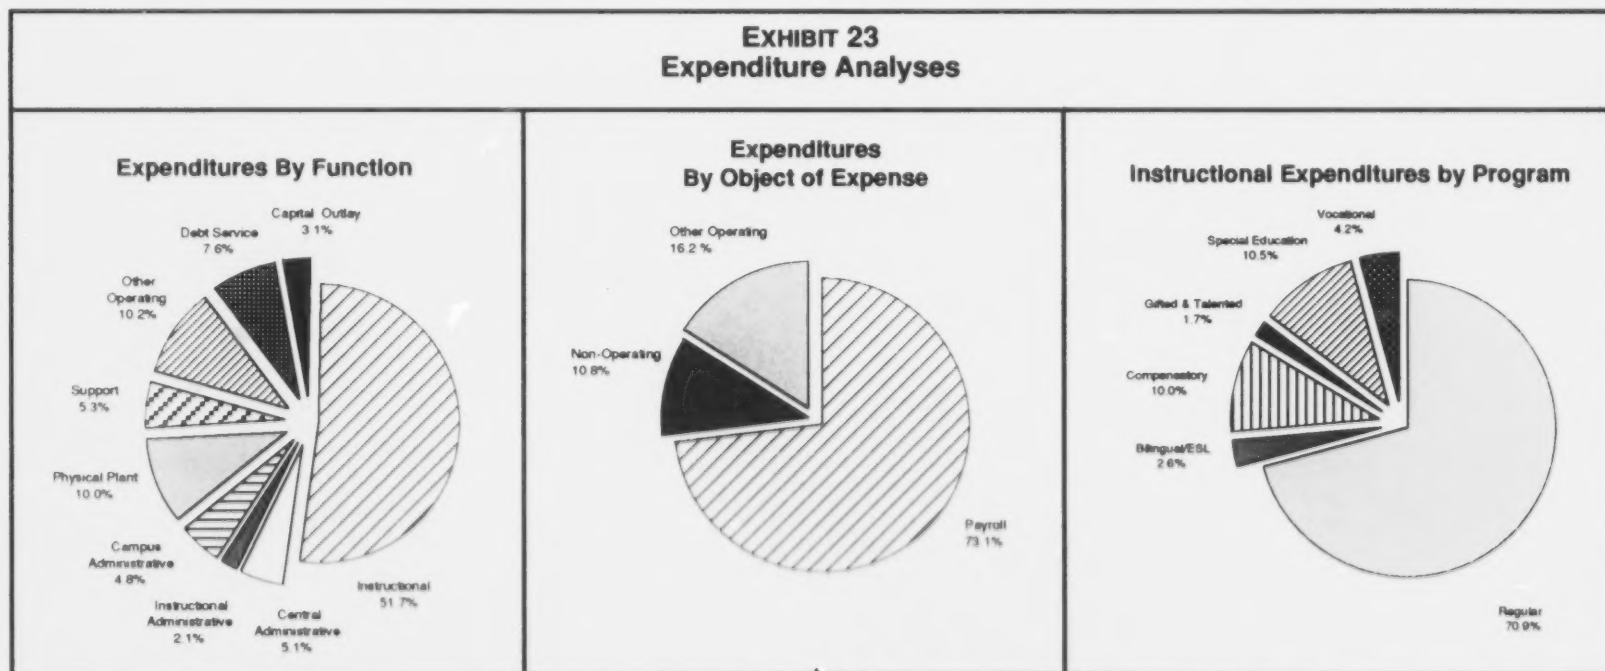

discretionary and may be spent at either the state or local level.

Examples of federal funds distributed to school districts are: the National School Lunch Program, various special education funds, and the Chapter I program for low-income students.

EXPENDITURES

In 1990-91 districts budgeted \$14.2 billion in expenditures, or \$4,200 per pupil, a six percent increase over 1989-90. Total expenditures are divided into current operating and non-operating expenditures. Current operating expenditures are all salaries, services and supplies. Non-operating expenditures are the construction or remodeling of facilities, and the repayment of debt.

EXHIBIT 23
Expenditure Analyses

Expenditures are classified by functions, which describe the broad purposes of expenditures, such as instruction or administration. Object classifications describe the items purchased. See *Exhibit 23* for a percentage breakdown of various expenditure categories by function, object, and program.

Expenditures by Function

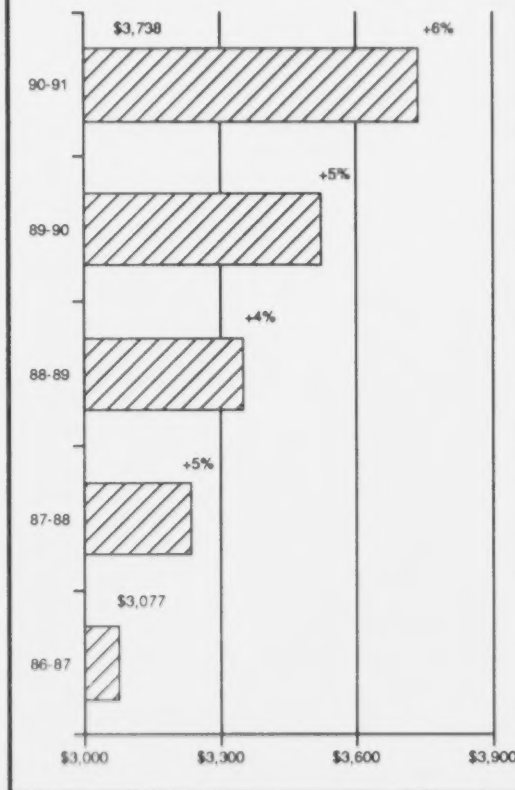

Expenditures for instruction accounted for over half (52 percent) of all funds budgeted during the 1990-91 school year. Instruction includes all activities dealing directly with the instruction of pupils, including instruction through the use of computers. Teacher and educational aide salaries and classroom equipment are other examples of the types of expenses that are identified in this function.

Other major expenditures by function are in the support services categories, including libraries and pupil services with 5.3 percent; administration, 12 percent; and plant services, 10 percent.

Expenditures by Object

By object of expense, payroll represents 73.1 percent of all school district expenditures. As a percent of current operating expenditures, payroll accounts for 82 percent. Payroll includes salaries, wages, and employee benefits for school district employees.

EXHIBIT 24
Trends in Operating Expenditures
per Pupil: 1987 to 1991

Budgeted operating expenditures per student have increased more than 21 percent since 1986-87. Percentages shown represent year-to-year change.

Expenditures for other operating categories such as purchased and contracted services, and supplies and materials account for an additional 16.2 percent of the budget. Debt service and capital outlay, both non-operating categories, make up the remaining 10.8 percent. *Exhibit 24* depicts the increases in per pupil operating expenditures that have occurred since 1986-87.

RECEIPTS AND DISBURSEMENTS

School districts are not the only agencies which spend money for public school education. Although almost 90 percent of the disbursements for public school education are made by local school districts, the remaining 10 percent are spent by other governmental entities such as federal, state, and county governments, and regional Education Service Centers.

Exhibit 25 shows that actual disbursements are estimated at \$16 billion for 1990-91. Receipts, the sum of revenue plus funds raised through the issuance of debt, increased almost 11 percent over 1989-90. Disbursements, the total of all expenditures and other uses of funds by all entities for public education, increased by almost 9 percent.

The greatest growth in receipts (46 percent) occurred in the "Other Resources" category, which consists of proceeds from bonds, loans and the sale of assets. The next highest rate of growth, over 12 percent, occurred in the state revenue category. Local revenues increased by 6.8 percent and federal revenues decreased by 3.4 percent.

Local disbursements increased by 8.1 percent since 1989-90. Local disbursements are made up of funds from local taxes, and state

and federal revenues. State disbursements increased 14 percent, primarily due to increases in contributions to the teacher retirement system. Other state disbursements were made for school textbooks, the cost of state-administered schools, and the expenses of the Texas Education Agency.

The federal government contributed food commodities worth \$65.5 million to school districts. A portion of the federal designated purpose funds are spent by the state for

agency administration and development projects. ESCs and county governments generated and spent additional funds for district support services.

Proceeds from the sale of bonds and payments on existing debt are not classified as revenues and expenditures, but they do represent other resources committed to public education. Funds raised from the sale of bonds are not immediately spent in the year of collection. In 1990-91, over two and one-half times more debt was issued than school districts retired.

EXHIBIT 25 1990-91 Receipts and Disbursements by Source

<u>Originating Source</u>	<u>Receipts</u>	<u>Pct. of Total</u>	<u>Disbursements</u>	<u>Pct. of Total</u>	<u>Spending Agents</u>

The sources of the data shown are TEA accounting records, the TEA's budget request to the Legislative Budget Board, and actual financial data reported to the TEA by all school districts. Revenues and expenditures in this exhibit do not match revenue and expenditure items in the District Detail for two reasons: 1) the Detail reports budgeted information while this exhibit shows preliminary actual amounts, and 2) the Detail shows revenue and expenditures of only one entity involved in public education spending, local school districts.

Detailed Statistics

Extensive information about students, student performance, district staff, and district finances for 1990-91 follows. Group summary tables and distribution tables are presented on pages 26 through 49, followed by individual school district level data beginning on page 50.

Category Descriptions

Items are summarized by district size, community type, property wealth, total effective tax rate, and ESC region. A description of each of these summary groups is provided below:

Enrollment Groupings

Districts are grouped into nine size categories according to their total student enrollment for the year. Districts of similar size are grouped together.

Community Type

Districts are classified on a scale ranging from major urban to rural. Factors such as size, growth rates, and proximity to an urban area are used to determine the appropriate group. The groups are:

Major Urban. The eight largest school districts in the state which serve the metropolitan areas of Houston, Dallas, San Antonio, Fort Worth, Austin, Corpus Christi, and El Paso.

Major Suburban. Other school districts in and around the major urban areas.

Other Central City. The major school districts in other large Texas cities.

Other Central City Suburban. Other school districts in and around the other large, but not major, Texas cities.

Independent Town. The largest school districts in the counties with populations of 25,000 to 100,000.

Non-Metro: Fast Growing. The school districts that fail to be in any of the above categories and that exhibit a five-year growth rate of at least 20 percent. These districts must have a population of at least 300 students.

Non-Metro: Stable. The school districts that fail to be in any of the above categories, yet have a student population that exceeds the state median, which in 1990-91 was 775 students.

Rural. The school districts that fail all of the above tests for placement into a category. These districts have enrollment between 300 and the state median and a growth rate less than 20 percent, or they have enrollment less than 300.

Total Effective Tax Rates

Districts are grouped into four categories, or quartiles, with approximately equal numbers of districts in each. The category shows the total effective tax rate, which is determined by dividing the 1990 total levy amount by the 1990 SPTB total taxable property value. The six special statutory districts do not levy property taxes.

Property Wealth

Wealth is defined as total taxable property value per student enrolled and is used as an indicator of a district's ability to raise local funds. The property value used is 1990 taxable value as determined by the State Property Tax Board (SPTB). Districts are classified into 20 categories with approximately equal numbers of students in each, or approximately five percent of total enrollment per category. The six special statutory districts form the 21st group because they have no taxable property wealth.

Education Service Center Regions

The state is divided into 20 geographic regions, each served by an Education Service Center. The number of districts assigned to each ESC region varies.

Distribution Statistics

This information is presented to help readers better understand the distribution of a particular item among Texas public school districts. By examining the variance between the high, low, and intermediate values, it is possible to determine whether districts behave similarly, as in the case of pupil to teacher ratios, or very differently, as in the case of the number of students enrolled.

Each item is analyzed independently: the district with the highest value for one item is not necessarily the district with the highest value for other items. The terms used are defined below:

Lowest (Highest) Value. For any given item, the lowest (highest) value found among all the districts.

XXth Percentile. For any given item, a value chosen such that XX percent of the school districts are below the chosen value. For example, the 10th percentile means that 10 percent of the school districts have values lower than the value shown.

Median. For any given item, a value chosen such that half of the school districts are below the chosen value, and half are above.

State of Texas. For most items this is the sum of all the reported district values. For ratios or percent calculations, the state total is computed as the sum of all the numerators, divided by the sum of all the denominators. For these items, the state statistics is a weighted state average.

District Detail

The information for school districts is sequenced such that all 91 data items are presented in a six page layout for approximately 30 districts at a time. The 91 items pertain to students, student performance, district staff, and district finances.

Districts are sequenced alphabetically within counties. Counties are numbered and are also arranged alphabetically. To locate a particular district by name, see the *District Listing* in the appendix. This listing provides the county and county number needed to find a district in the *District Detail* section. As with the grouped reports (size, type, tax effort, wealth, ESC regions) and *Distribution Statistics*, a state summary line concludes the *District Detail*.

Definitions of the 91 data items begin on page 260.

ITEM DEFINITIONS

Items are defined in the sequence they appear in the *District Detail* section of the report. The data items are numbered to correspond with numbers used in the column headings. To ascertain data sources for these items, refer to the *Data Sources* appendix which cross references sources with the items defined below.

COUNTY NUMBER AND NAME: The county number is a unique identifier assigned to each county for administrative purposes. The numbers correspond to the alphabetic arrangement of county names.

(Source: TEA District Master Files).

DISTRICT NAME: The name of the district which includes a designator for the governance system. These designators are:

- ISD INDEPENDENT SCHOOL DISTRICT**
A locally elected board of trustees governs the district.
- CSD COMMON SCHOOL DISTRICT**
The county commissioners court governs the school district.
- MSD MUNICIPAL SCHOOL DISTRICT**
The city council governs the school district.

Most school districts are independent school districts. Due to space limitations, the "ISD" designation has been omitted but other governance designators have been retained.

(Source: TEA District Master Files).

REGION: The Education Service Center region to which the district is assigned based upon its geographic location. There are 20 ESCs serving districts in the various areas of the state.

(Source: TEA District Master Files).

CO-OP STATUS: An indicator of whether or not a district participates in a Special Education cooperative. An "F" indicates the district is a fiscal agent, an "M" indicates the district is a member, and a blank means the district does not participate. For these districts, dollar amounts per student may be distorted because student counts and amounts budgeted may be reported by different districts. Districts participating in other types of cooperatives are not indicated.

(Source: Special Ed. Co-ops).

1. STATE BOARD OF EDUCATION DISTRICT: The number of the SBOE district to which the school district is assigned based upon its geographic location. If a district is represented by more than one SBOE district, the district associated with the location of the central office is reported. See *Exhibit D*, the State Board of Education District Map, in the *End Notes* appendix.

(Source: Texas Legislative Council Maps).

2. ACCREDITATION STATUS: The accreditation status of the district as of June 1991. The Division of Accreditation visits some 200 districts each year and re-evaluates their status. Districts are classified as either FA-Fully Accredited; AD-Advised; or AU-Academically Unaccredited.

Advised means there are discrepancies between the district's program or operations and accreditation requirements. Academically unaccredited means the district's accreditation has been revoked by the commissioner due to failure to meet or maintain compliance with accreditation requirements.

As of June 1991, over 96 percent of the districts in the state were fully accredited. The status of districts changes continuously. The current status of any district may be different than that shown in this publication.

(Source: Division of Accreditation).

3. NUMBER OF REGULAR HIGH SCHOOLS: The number of high school campuses in a district identified by the range of grades offered as reported to TEA. The most common grades offered for each of the types are: Elementary, grades K-6; Middle School, grades 6-8; Junior High, grades 7-8; High Schools, grades 9-12; Elementary/Secondary, grades K-12. See *Exhibit A* in the *End Notes* for the details of which grades offered fall into each category.

(Source: TEA District Master Files).

4. TOTAL ENROLLMENT: The number of students in membership as of October 26, 1990, in grades pre-kindergarten through twelve.

(Source: PEIMS, 110).

5. FIVE YEAR % CHANGE IN ENROLLMENT: The percent change in total enrollment for the five year period from 1985-86 to 1990-91. This definition differs from prior editions of *Snapshot* in that an additional year has been included in the calculation.

This makes the period over which enrollment is being compared five years, as is indicated in the label.

(Source: Fall Survey of Pupils; PEIMS, 110).

6. **% WHITE:** Percentage of enrollment reported as white.
(Source: PEIMS, 110).

7. **% AFRICAN AMERICAN:** Percentage of enrollment reported as African American.
(Source: PEIMS, 110).

8. **% HISPANIC:** Percentage of enrollment reported as Hispanic.
(Source: PEIMS, 110).

9. **% OTHER:** Percentage of enrollment reported as other. Other is the combination of Asian/Pacific Islander and Native American counts.
(Source: PEIMS, 110).

10. **PRIOR YEAR DROPOUT RATE:** The total number of 1989-90 dropouts reported in grades 7-12 expressed as a percent of the total number of students enrolled in grades 7-12 in 1989-90.

Students reported absent for a period of 30 or more consecutive days between September 1989 and August 1990 without prior approval or documented transfer to another public secondary school are included in this total. This total also includes students that failed to re-enroll at the beginning of the 1990-91 school year.

Districts with 7th-12th graders which reported that no students dropped out have a zero (0) dropout rate. If dropout data are not required

for a district because only lower grades are offered, then an asterisk is printed.

(Source: PEIMS, 110, 201).

11. **ATTENDANCE RATE:** Total average daily attendance (ADA) for the second six-week period expressed as a percent of average daily membership (ADM). Grades K-12 are included.
(Source: SSR, Table I).

12. **% LOW INCOME:** Counts of students reported with any one of three economically disadvantaged status codes; eligible for free meals under the National School Lunch and Child Nutrition Program, eligible for reduced-price meals under the National School Lunch and Child Nutrition Program, or other economically disadvantaged.

Other economically disadvantaged includes students from a family with an annual income at or below the official federal poverty line, students eligible for Aid to Families with Dependent Children (AFDC) or other public assistance, students who have received a Pell Grant or comparable state program of need-based financial assistance, or students eligible for programs assisted under Title II of the Job Training Partnership Act (JTPA).

Students reported with any one of these three status codes may or may not be enrolled in a special program such as compensatory or special education.

(Source: PEIMS, 110).

13. **EXPECTED GRADUATION RATE:** The number of 12th grade students expected to graduate in the spring of 1991, divided by the total number of 12th grade students enrolled.
(Source: PEIMS, 110).

14. **% EXPECTED TO ATTEND COLLEGE:** The number of students who self-report that they plan to attend college within one year of graduation expressed as a percent of the total number of expected graduates.

(Source: PEIMS, 110).

15. **% SPECIAL EDUCATION:** Students identified as participating in special education expressed as a percent of total enrollment. Students in special education may also be counted in another special program such as vocational or bilingual education.

(Source: PEIMS, 110).

16. **% BILINGUAL/ESL EDUCATION:** Students identified as participating in Bilingual Education or English as a Second Language (ESL) expressed as a percent of total enrollment. Students in bilingual/ESL education may also be counted in another special program such as special or vocational education.

(Source: PEIMS, 110).

17. **% VOCATIONAL EDUCATION:** Students identified as taking vocational education courses expressed as a percent of total enrollment. Students in vocational education may also be counted in another special program such as special or bilingual education.

(Source: PEIMS, 110).

18. **% GIFTED AND TALENTED:** Students identified and served in operational Gifted and Talented programs expressed as a percent of total enrollment. Students in gifted and talented education may also be counted in another special program such as vocational or bilingual education.

(Source: PEIMS, 110).

19. **% PASSING ALL GRADES:** For all grades and subject areas, the total number of students who passed all tests taken, expressed as a percentage of the total number of students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity.
(Source: TAAS).

20. **% PASSING GRADE 3 (ENGLISH):** For all grade three subject area tests (in English), the number of students who passed all tests taken, expressed as a percentage of the total number of students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity.
(Source: TAAS).

21. **% PASSING GRADE 5:** For all grade five subject area tests, the number of students who passed all tests taken, expressed as a percentage of the total number of students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity.
(Source: TAAS).

22. **% PASSING GRADE 7:** For all grade seven subject area tests, the number of students who passed all tests taken, expressed as a percentage of the total number of students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where

fewer than five students were tested to protect the students' anonymity.
(Source: TAAS).

23. **% PASSING GRADE 9:** For all grade nine subject area tests, the number of students who passed all tests taken, expressed as a percentage of the total number of students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity.
(Source: TAAS).

24. **% PASSING GRADE 11:** For all grade eleven subject area tests, the number of students who passed all tests taken, expressed as a percentage of the total number of students taking one or more tests. Grade 11 test results are reported for students taking the test for the first time only, and are from the October 1990 administration of the test. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity.
(Source: TAAS).

25. **% WHITE STUDENTS PASSING:** For all grades and subjects, the number of white students who passed all tests taken, expressed as a percentage of the total number of white students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity.
(Source: TAAS).

26. **% AFRICAN AMERICAN STUDENTS PASSING:** For all grades and subjects, the number of African American students who passed all tests taken, expressed as a percentage of the total number of African American students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity.
(Source: TAAS).

27. **% HISPANIC STUDENTS PASSING:** For all grades and subjects, the number of Hispanic students who passed all tests taken, expressed as a percentage of the total number of Hispanic students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity.
(Source: TAAS).

28. **% OTHER STUDENTS PASSING:** For all grades and subjects, the number of Asian and Native American students who passed all tests taken, expressed as a percentage of the total number of Asian and Native American students taking one or more tests. Special education students and their scores have been excluded. "LT5" will appear in cases where fewer than five students were tested to protect the students' anonymity.
(Source: TAAS).

29. **NUMBER TESTED (SAT):** The count of graduating seniors who took the Scholastic Aptitude Test (SAT) at least once prior to May 1990.
(Source: SAT/ACT Files).

- 30. MEAN TOTAL SCORE (SAT):** The sum of the mathematics and verbal portions of the SAT divided by the number of graduating seniors tested. Total scores for the SAT range from 400 to 1600 and include only the most recent scores received by graduates on an SAT taken anytime during their high school years. Scores are reported for twelfth graders scheduled to graduate during the 1989-90 school year.

If no students were tested or no scores were reported, then an asterisk is printed. "LT5" will appear in cases where fewer than five students were tested to protect the confidentiality of the students' test scores.
(Source: SAT/ACT Files).

- 31. NUMBER TESTED (ACT):** The count of graduating seniors who took the American College Test (ACT) during the 1989-90 school year.
(Source: SAT/ACT Files).

- 32. ENHANCED MEAN COMPOSITE SCORE (ACT):** The average of the scores from the English, mathematics, reading, and science reasoning portions of the ACT. Composite scores for the Enhanced ACT range from 1 to 36 and include only the most recent scores received by graduates during either the junior or senior years. Scores are reported for twelfth graders who graduated in the end of the 1989-90 school year.

Scores for some of the graduates were obtained on the original ACT, which had social studies and natural sciences portions rather than reading and science reasoning. Original ACT composite scores were reported on the Enhanced ACT scale by the American College Test company.

If no students were tested or no scores were reported, then an asterisk is printed. "LT5" will appear in cases where fewer than five students were tested to protect the confidentiality of students' test scores.
(Source: SAT/ACT Files).

- 33. TOTAL STAFF FTE:** A count of all personnel employed by the school district as of fall 1990, including both professional and non-professional positions. All staff counts are expressed as full-time equivalents. The appropriate portion of an FTE is allocated to each of the responsibilities associated with an individual based on a percentage of total time worked.
(Source: PEIMS, 050).

- 34. TOTAL TEACHER FTE:** The FTE count of personnel categorized as teachers, including special duty and substitute teachers.
(Source: PEIMS, 050, 090).

- 35. % CENTRAL ADMINISTRATIVE STAFF:** The FTE count of personnel classified as administrators in the central office, expressed as a percent of total staff FTE's. Central office administrators include assistant superintendents, superintendents, business managers, tax assessor collectors, directors of personnel; as well as administrative officers, instructional officers, athletic directors, department heads and registrars if reported with a '700' campus code. See *Exhibit C* in the *End Notes* for a complete listing.
(Source: PEIMS, 050, 090).

- 36. % CAMPUS ADMINISTRATIVE STAFF:** The FTE count of personnel classified as campus administrators, expressed as a percent of total staff FTE's. Campus administrators include assistant principals, principals; as

well as administrative officers, instructional officers, athletic directors, department heads and registrars if reported with a campus code other than '700'. See *Exhibit C* in the *End Notes* for a complete listing.
(Source: PEIMS, 050, 090).

- 37. % PROFESSIONAL SUPPORT STAFF:** The FTE count of personnel categorized as support staff expressed as a percent of total staff FTEs. Support staff are defined as therapists, psychologists, counselors and social workers, diagnosticians, physicians and nurses, librarians, supervisors, and miscellaneous other support roles. See *Exhibit C* in the *End Notes* for a complete listing.
(Source: PEIMS, 050, 090).

- 38. % TEACHERS:** The teacher FTE count expressed as a percent of total staff FTEs.
(Source: PEIMS, 050, 090).

- 39. % EDUCATIONAL AIDES:** The FTE count of personnel categorized as educational aides expressed as a percent of total staff FTEs. Educational aides are involved in instructional support.
(Source: PEIMS, 050, 090).

- 40. % AUXILIARY STAFF:** The FTE count of personnel categorized as auxiliary staff expressed as a percent of total staff FTEs. Auxiliary staff are those personnel for whom no role was reported. Examples include cafeteria workers and bus drivers.
(Source: PEIMS, 050, 090).

- 41. AVERAGE CENTRAL ADMINISTRATIVE SALARY:** The total salary of central administrators divided by the total FTE count of central administrators. The total salary

amount includes base pay only; any supplements are excluded.

(Source: PEIMS, 060).

42. **AVERAGE CAMPUS ADMINISTRATIVE SALARY:** The total salary of campus administrators divided by the total FTE count of campus administrators. The total salary amount includes base pay only; any supplements are excluded.
(Source: PEIMS, 060).

43. **AVERAGE PROFESSIONAL SUPPORT SALARY:** The total salary of professional support staff divided by the total FTE count of professional support staff. The total salary amount includes base pay only; any supplements are excluded.
(Source: PEIMS, 060).

44. **AVERAGE TEACHER SALARY:** The total salary of teachers divided by the total FTE count of teachers. The total salary amount is base pay only, and does not include career ladder or any other supplements.
(Source: PEIMS, 060).

45. **% MINORITY STAFF:** The FTE count of all personnel reported as non-white expressed as a percent of total staff FTEs.
(Source: PEIMS, 040).

46. **RATIO OF STUDENTS TO TOTAL STAFF:** The total number of students enrolled divided by the total staff FTE count.
(Source: PEIMS, 050, 110).

47. **RATIO OF STUDENTS TO TEACHERS:** The total number of students enrolled divided by the total teacher FTE count.
(Source: PEIMS, 090, 110).

48. **AVERAGE TEACHER APPRAISAL SCORE:** The total of all appraisal scores divided by the number of teachers appraised. Appraisal scores are based on a statewide teacher appraisal system which provides a process and criteria with which to evaluate the performance of teachers for career ladder level assignment purposes. Beginning in 1988-89, the range of appraisal scores changed from 0-5 to 0-184. In 1989-90 the acceptable minimum score was changed to 0.1.

0.1 - 79.9	Unsatisfactory
80.0 - 103.9	Below Expectations
104.0 - 135.9	Meets Expectations
136.0 - 159.9	Exceeds Expectations
160.0 - 184.0	Clearly Outstanding

(Source: PEIMS, 050).

49. **% TEACHERS WITH 1 OR MORE PERMITS:** The FTE count of teachers holding at least one permit as of fall 1989, expressed as a percent of the total teacher FTE count. Teachers with multiple permits are counted only once.

TEA issues four types of permits that meet different situations and require different qualifications: emergency teaching, nonrenewable, special assignment, and vocational. Superintendents may activate temporary classroom assignment permits without TEA approval. Teachers holding one or more of any of these types of permits are included in the count.

(Source: PEIMS, 080).

50. **% WITH 5 OR FEWER YEARS OF EXPERIENCE:** The FTE count of teachers with zero through five total years of teaching experience expressed as a percent of the total

teacher FTE count. Total years of teaching experience includes experience earned in another Texas school district or in another state.

(Source: PEIMS, 040).

51. **AVERAGE YEARS OF EXPERIENCE:** A weighted average obtained by multiplying each teacher's FTE count by his or her years of experience, summing for all weighted counts, and then dividing by total teacher FTEs. Adjustments have been made so that teachers with zero years of experience are appropriately weighted in the formula.

(Source: PEIMS, 040).

52. **% WITH ADVANCED DEGREES:** The FTE count of teachers with master's or doctorate degrees expressed as a percent of total teachers.

(Source: PEIMS, 040).

53. **% ON CAREER LADDER LEVEL 2:** The fall of 1990 FTE count of teachers reported as placed on level two, expressed as a percent of total teacher FTEs. Many districts do not make career ladder placement decisions until the end of the school year; therefore counts may be under-reported.

(Source: PEIMS, 050).

54. **% ON CAREER LADDER LEVEL 3:** The fall 1990 FTE count of teachers reported as placed on level three, expressed as a percent of total teacher FTEs. Many districts do not make career ladder placement decisions until the end of the school year; therefore counts may be under-reported.

(Source: PEIMS, 050).

55. **% WHITE:** The FTE count of teachers reported as white expressed as a percent of total teacher FTEs.
(Source: PEIMS, 040).
56. **% AFRICAN AMERICAN:** The FTE count of teachers reported as African American expressed as a percent of total teacher FTEs.
(Source: PEIMS, 040).
57. **% HISPANIC:** The FTE count of teachers reported as Hispanic expressed as a percent of total teacher FTEs.
(Source: PEIMS, 040).
58. **% OTHER:** The FTE count of teachers reported as Asian or American Indian/Eskimo expressed as a percent of total teacher FTEs.
(Source: PEIMS, 040).
59. **% REGULAR EDUCATION:** The FTE count of teachers identified as serving students receiving regular education instruction, expressed as a percent of total teacher FTEs.
(Source: PEIMS, 090).
60. **% SPECIAL EDUCATION:** The FTE count of teachers identified as serving students receiving special education instruction, expressed as a percent of total teacher FTEs.
(Source: PEIMS, 090).
61. **% COMPENSATORY EDUCATION:** The FTE count of teachers identified as serving students receiving compensatory education instruction, expressed as a percent of total teacher FTEs.
(Source: PEIMS, 090).
62. **% BILINGUAL/ESL EDUCATION:** The FTE count of teachers identified as serving students receiving bilingual education or English as a Second Language (ESL) instruction, expressed as a percent of total teacher FTEs.
(Source: PEIMS, 090).
63. **% VOCATIONAL EDUCATION:** The FTE count of teachers identified as serving students receiving vocational education instruction, expressed as a percent of total teacher FTEs.
(Source: PEIMS, 090).
64. **% OTHER EDUCATION (INCLUDES GIFTED AND TALENTED):** The FTE count of teachers identified as serving students receiving gifted and talented education instruction, students in honors classes and students served in migrant programs, expressed as a percent of total teacher FTEs. On average, almost 97 percent of this category consists of teachers serving gifted and talented or honor students.
(Source: PEIMS, 090).
65. **TAXABLE VALUE PER PUPIL:** The district's total taxable property value in 1990 as determined by the State Property Tax Board, divided by the total enrollment of the district in 1990-91. This property value is determined by the SPTB as part of its annual study which attempts to present uniformly appraised property valuations statewide. The SPTB value is calculated by applying ratios created from uniform independent appraisals to the district's assessed valuations.
(Sources: SPTB, Study; PEIMS, 110).
66. **EQUALIZED TOTAL TAX RATE:** The total tax levy for the 1990-91 school year divided by the 1990 SPTB taxable value. The total tax levy is the sum of the maintenance and operation and debt service levies generated by applying a district's adopted tax rates to its locally assessed valuation of property. An equalized, or effective tax rate is the rate that is necessary to raise a district's actual tax levy when applied to the district's total taxable value as determined by the SPTB. (NOTE: The SPTB taxable value is not the same as the locally assessed value.)
(Sources: SPTB, Study; SPTB, Self Report).
67. **STATE AID AND LOCAL TAXES PER PUPIL:** The amount of state money allocated to the school district under the Foundation School Program plus the levy amount generated by the locally adopted total tax rate of the district. This amount divided by total enrollment results in the per pupil amount shown. This item indicates the total estimated amount of funds available to the district from both state and local sources, both within and outside of the FSP system. Unequalized local funds are included in this amount. The state money component of this item is the same amount shown in item 69. The amount of unequalized revenue is the difference between item 68 and item 67.
(Sources: Foundation Master; PEIMS, 110).
68. **TOTAL FSP REVENUE PER PUPIL:** The level of revenue which is recognized and supported by the equalized state system. This amount includes estimates of all state and local funds available to the district that are in Tier I and Tier II of the Foundation School Program. Local enrichment that is outside the FSP (unequalized local enrichment) is not included in this amount. This amount divided by total enrollment results in the per pupil amount shown.
(Sources: Foundation Master; PEIMS, 110).

69. **STATE AID PER PUPIL:** The estimated amount of state money allocated to the school district under the Foundation School Program divided by each district's total enrollment. This amount is a component of item 67.

(Source: *Foundation Master*; PEIMS, 110).

70. **TOTAL REVENUE:** Budgeted revenue from all local, state, and federal sources, except for receipts from the sale of bonds and other revenues budgeted in fund 60, the capital projects fund. See *Exhibit B* in the *End Notes* for a technical description of this item. *Bulletin 679, Financial Accounting Manual*, sets standards for the accounting of revenues. (Source: PEIMS, 030).

71. **TOTAL REVENUE PER PUPIL:** Total revenue divided by total enrollment. (Source: PEIMS, 030, 110).

72. **% STATE:** Revenue from state sources, such as per capita and foundation program payments, revenue from other state funded programs such as Adult Basic Education, and revenue from other state agencies, expressed as a percent of total revenue. See *Exhibit B* in the *End Notes* for a technical description of this item. (Source: PEIMS, 030).

73. **% LOCAL AND OTHER:** Revenue from local taxes, other local sources, and intermediate sources expressed as a percent of total revenue. See *Exhibit B* in the *End Notes* for a technical description of this item. (Source: PEIMS, 030).

74. **% FEDERAL:** Revenue received directly from the federal government or distributed by TEA for vocational education, programs for

educationally disadvantaged children, food service programs, and other federal programs, expressed as a percent of total revenue. See *Exhibit B* in the *End Notes* for a technical description of this item. (Source: PEIMS, 030).

75. **TOTAL EXPENDITURES:** Budgeted outlays of money for all functions and objects, except for expenditures budgeted in fund 60, the capital projects fund. *Bulletin 679, Financial Accounting Manual* sets standards for the accounting of expenditures.

Expenditures are accounted for using codes for fund, function, object, organization; and, in some cases, program area. See *Exhibit B* in the *End Notes* for a technical description of this item.

(Source: PEIMS, 030).

76. **% INSTRUCTIONAL:** The percentage of total expenditures budgeted for instructional expenditures in the district. Instructional expenditures include expenditures for all activities dealing directly with the instruction of pupils, including instruction aided with computers. See *Exhibit B* in the *End Notes* for a technical description of this item. (Source: PEIMS, 030).

77. **% CENTRAL ADMINISTRATIVE:** The percentage of total expenditures budgeted for central administration expenditures in the district. Central administrative expenditures include expenditures for the general administration of the district, the development of personnel and curriculum, and data processing services. See *Exhibit B* in the *End Notes* for a technical description of this item. (Source: PEIMS, 030).

78. **% CAMPUS ADMINISTRATIVE:** The percentage of total expenditures budgeted for campus administration expenditures in the district. Campus administration expenditures include expenditures for the operation and management of a school. See *Exhibit B* in the *End Notes* for a technical description of this item.

(Source: PEIMS, 030).

79. **% PLANT SERVICES:** The percentage of total expenditures budgeted for physical plant maintenance and operation. See *Exhibit B* in the *End Notes* for a technical description of this item.

(Source: PEIMS, 030).

80. **% OTHER OPERATING:** The percentage of total expenditures budgeted for all other operating expenditures in the district. Other operating expenditures include expenditures for support services, pupil transportation, food services, and co-curricular activities. See *Exhibit B* in the *End Notes* for a technical description of this item.

(Source: PEIMS, 030).

81. **NON-OPERATING:** The percentage of total expenditures budgeted for non-operating expenditures in the district. Non-operating expenditures include capital outlay expenditures not made from fund 60, the capital projects fund; debt service expenditures; and, ancillary services expenditures. See *Exhibit B* in the *End Notes* for a technical description of this item.

(Source: PEIMS, 030).

82. **TOTAL OPERATING EXPENDITURES:** The sum of all expenditures budgeted for the operation of the district. The operating expenditures are a subset of the total expendi-

tures; they do not include debt service or capital outlay. See *Exhibit B* in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030).

83. TOTAL OPERATING EXPENDITURES PER PUPIL: Total operating expenditures divided by total enrollment.
(Sources: PEIMS, 030, 110).

84. TOTAL INSTRUCTIONAL EXPENDITURES: The sum of budgeted expenditures for all activities dealing directly with the instruction of pupils, including instruction through the use of computers. This is the amount used in the percent calculation for item 76.
(Source: PEIMS, 030).

85. TOTAL INSTRUCTIONAL EXPENDITURES PER PUPIL: Budgeted instructional expenditures divided by total enrollment.
(Sources: PEIMS, 030, 110).

86. % REGULAR EDUCATION: Expenditures budgeted for the regular education program expressed as a percent of total instructional expenditures. See *Exhibit B* in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030).

87. % SPECIAL EDUCATION: Expenditures budgeted for the special education program expressed as a percent of total instructional expenditures. See *Exhibit B* in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030).

88. % COMPENSATORY EDUCATION: Expenditures budgeted for the compensatory education program expressed as a percent of total instructional expenditures. See *Exhibit B* in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030).

89. % BILINGUAL/ESL EDUCATION: Expenditures budgeted for the bilingual education and English as a Second Language programs expressed as a percent of total instructional expenditures. See *Exhibit B* in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030).

90. % VOCATIONAL EDUCATION: Expenditures budgeted for the vocational education program expressed as a percent of total instructional expenditures. See *Exhibit B* in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030).

91. % GIFTED AND TALENTED EDUCATION: Expenditures budgeted for the gifted and talented education program expressed as a percent of total instructional expenditures. See *Exhibit B* in the *End Notes* for a technical description of this item.
(Source: PEIMS, 030).

Appendix

DATA SOURCES

Data sources are arranged in alphabetical order by the abbreviations used in the *Item Definitions* section.

DIVISION OF ACCREDITATION: A Texas Education Agency division that is responsible for accrediting school districts. This division maintains information regarding the current accreditation status of all districts in the state. The information is updated frequently to reflect the results of site visits by accreditation teams. Accreditation status in this publication was current as of June 1991. *Item 2.*

FALL SURVEY OF PUPILS: *The Fall Survey of Pupils in Membership* taken in October 1985. This report provided a one day head count of the total number of students enrolled on the first Monday of October each school year. Counts of students were collected by campus, by grade, by ethnicity, by gender, and by population type (either regular or special education). This report was discontinued after the 1989-90 school year. Counts of students began to be collected through PEIMS thereafter. *Item 5.*

FOUNDATION MASTER: A TEA data file that contains detailed information about state funding amounts and calculations for each entity receiving state monies under the Foundation School Program. *Items 67-69.*

PEIMS: All information in this document from the *Public Education Information Management System* was reported in the fall 1990 submission. Districts were asked to report data as of October 26, 1990. Districts reported budgeted financial data for the entire 1990-91 school year. For more information about the fall and spring PEIMS reporting requirements see the *1990-91 Public Education Information Management System Data Standards*. PEIMS data sources have been subdivided by type of information reported.

030: Budget Amounts. Amounts budgeted by the district, or campus if appropriate, reported by fund, function, object, and in some cases by program. *Items 70-91; Exhibits 19, 22-24.*

040: Staff Demographics. Information about each employee's gender, ethnicity, years of experience, and post-secondary degree. *Items 45, 50-52, 55-58; Exhibit 16.*

050: Employment Characteristics. Information for each employee such as tenure, full-time equivalency status, and career ladder information. *Items 33-40, 46, 48, 53, 54; Exhibit 18.*

060: Payroll. The payroll amounts paid to each employee. Both base pay and any supplement amounts are reported by fund, function, object, and program. *Items 41-44; Exhibit 17.*

080: Permit. The type of permit, issue date, renewal date, role of the individual permitted, and permit subject area. *Item 49.*

090: Responsibilities. The duties performed by each professional employee. Districts report each class schedule for the employees who are teachers. *Items 34-40, 47, 59-64; Exhibits 14, 15.*

110: Student Enrollment. Enrollment information about each student, including the student's grade, economically disadvantaged status, graduation and college plans, as well as indicators of the special programs in which the student participates. *Items 4-10, 12-18, 46, 47, 65, 67-69, 71, 83, 85; Exhibits 5-8.*

201: Basic Dropout Data. Last known information about a dropout; last campus of enrollment, grade level, special education indicator, free and reduced price lunch eligibility indicator, and exit reason. Also this record contains demographics about the dropout such as gender, ethnicity, and age. *Item 10; Exhibits 8-10.*

SAT/ACT FILE: With permission from public school districts, a file created by the TEA from Scholastic Aptitude Test (SAT) scores released by the College Board's Admissions Testing Program and Enhanced ACT scores released by the American College Testing Program for Texas graduating seniors. Both testing programs typically release summary test score statistics to the TEA, the media, and the public each September for Texas seniors who graduated during the previous school year. However, the more detailed data linking students' scores to campuses and districts (which are used to create the TEA file) typically become

available in the following spring. Thus, with the publication schedule, the test scores in this document are for 1989-90 graduating seniors. *Items 29-32. Exhibits 12, 13.*

SPECIAL ED. CO-OPS.: An annual TEA data file maintained by the Division of Special Education Funding and Compliance which indicates for each district whether or not the district is a member or fiscal agent of a special education cooperative, the type of district, how many members are in the cooperative, and if applicable, the cooperative name. *No item number; indicator that follows district name.*

SPTB, SELF REPORT: The *State Property Tax Board 1990 Self Report*. This report contains local tax roll assessed values for property, levy amounts, and tax rate information for all school districts with taxable property. *Item 66. Exhibit 20.*

SPTB, STUDY: The *State Property Tax Board 1990 Property Value Study*, May 31, 1991. This study provides local tax role property values as of January 1, 1990 for each district by category of land use as well as SPTB re-evaluated values. *Items 65, 66. Exhibit 20.*

SSR, TABLE I: The *Principal's Semester Report of Student Attendance and Contact Hours, Table I*. This report, submitted for the first time during the 1990-91 school year, provides attendance and contact hour information by six-week period and grade level for each campus. Three six-week periods are reported in the fall and three are reported in the spring. *Item 11.*

TEA DISTRICT MASTER FILES: TEA data files containing basic organizational attributes about school districts including district name and identification number, county name and number, Edu-

cation Service Center region, State Board of Education district, type of district (regular FSP, special statutory, or state-administered), and mailing address. *Item 3; Exhibits 1-4.*

TAAS: The Texas Assessment of Academic Skills test results for grades 3, 5, 7, and 9 from the February 1991, administration of the test, and grade 11 results from the October 1990, administration. In addition to percent passing by grade and subject, the TAAS test results indicate several characteristics of the students tested. *Items 19-28; Exhibit 11.*

TEXAS LEGISLATIVE COUNCIL MAPS: The Legislative Council maintains maps illustrating the State Board of Education districts which are defined by statute. The legal descriptions of the districts are available in *Texas Education Code 11.21 Composition of the Board. Item 1.*

END NOTES

ASSESSED VALUATION: This is the locally assessed value of property that a district actually taxes. Property values are assessed by county appraisal districts, not the school districts. Assessment practices can vary from district to district; that is, two properties of equal worth may not be appraised at the same value in two different districts. District practices in exempting property from taxation also vary. TEA receives information about locally assessed valuation from the State Property Tax Board, another state agency.

AVAILABLE SCHOOL FUND: The Available School Fund (ASF) was constitutionally created in 1876. It consists primarily of earnings from the Permanent School Fund and taxes dedicated to the fund by the state constitution. Most of the ASF revenue is distributed to local school districts on a per capita basis which is set by the State Board of Education using annual earnings estimates for the fund. The per capita apportionment to school districts in 1990-91 is \$322 per refined ADA. The ASF also pays for school textbooks.

BUDGET BALANCED: Districts which receive no Foundation School Program aid, except the constitutionally mandated Available School Fund per capita allotment, are called budget balanced. These districts are not required to raise their Local Fund Assignment since they do not participate in the FSP. Districts identified as budget balanced are those in which the sum of the Available School Fund payment plus the Local Fund Assignment is greater than the Foundation School Program budget as determined by state formulas.

CAMPUS TYPE: Campuses are divided into types according to the range of grades offered as reported to the TEA. The grid in *Exhibit A* shows the possible combinations of low and high grades for each of the campus types. For example, a campus offering a low grade of 5, found along the left edge of the grid, and a high grade of 6, found along the top edge of the grid, is classified as a middle school. A campus offering only grade 9 (both the low and high grade) is a high school.

ETHNICITY: Counts of students and staff are collected by major ethnic group. Counts of student enrollments and staff by ethnic group are derived from the fall 1990 PEIMS collection. These

major ethnic groups are white, Hispanic, African American, Asian/Pacific Islander, and Native American. In this publication "other" is presented as the sum of Asian/Pacific Islander and Native American.

EXPENDITURE FUNCTIONS: An expenditure function designates the purposes for which expenditures are made. Function codes used by school districts are outlined in section CDE-403 of *Bulletin 679, Financial Accounting Manual*. Functions for which money can be spent are:

- 11 Instruction;
- 12 Instructional Computing;
- 21 Instructional Administration;
- 22 Instructional Resources & Media Services;
- 23 School Administration;
- 24 Instructional Research & Development;
- 25 Curriculum & Personnel Development;
- 26 Communication and Dissemination;
- 31 Guidance and Counseling Services;
- 32 Attendance and Social Work Services;
- 33 Health Services;
- 34 Pupil Transportation;
- 36 Co-curricular Activities;
- 37 Food Services;
- 41 General Administration;
- 42 Debt Services;
- 51 Plant Maintenance and Operation;
- 52 Facilities Acquisition & Construction;
- 71 Management;
- 72 Computer Processing;
- 73 Development;
- 74 Interfacing/Technical Assistance; and
- 81 Community Services.

Exhibit B lists the function codes included in the revenue and expenditure items found in the *District Detail* section.

EXPENDITURE OBJECTS: These are categories of expenditures. Object codes are outlined in section CDE-409 of *Bulletin 679, Financial Accounting Manual*. Objects for which money can be spent are:

- 6100-Payroll Costs;
- 6200-Purchased & Contracted Services;
- 6300-Supplies & Materials;
- 6400-Other Operating Expenditures;
- 6500-Debt Service; and
- 6600-Capital Outlay.

Exhibit B lists the object codes included in the revenue and expenditure items found in the *District Detail* section.

FULL-TIME EQUIVALENTS: All staff counts are shown in terms of full-time equivalents (FTEs), a measure of the extent to which a person occupies a full-time position. For example, a teacher working a full day for the entire school year represents one FTE, a full-time teacher working one semester represents 1/2 FTE, and a teacher carrying a half load for the full year also represents 1/2 FTE.

FTE apportionments apply to both part-time and full-time staff performing multiple duties. In cases where a person performs multiple tasks, portions of that person's FTE are assigned according to the time spent at each duty. For example, a full-time person employed half the time as a teacher and half as an administrator would be counted as a 0.5 administrator FTE and a 0.5 teacher FTE.

AUXILIARY STAFF

Employment record, but no responsibility records reported.

The FTEs of Adult Basic Education staff or staff employed by special education cooperatives are not included in the information presented in this document. Adult Basic Education staff are identified as having either Adult Basic Education service codes or as being paid from fund code 31 or 80, meaning Adult Basic Education Fund and Trust and Agency Funds, respectively. Staff are identified as participants in a cooperative if their assigned campus number belongs in a district different from their employing district, or if they are reported with a campus number of 701. Only the portion of a person's total FTE amount associated with the campus in another district (or with the 701 record) was counted as cooperative.

GUARANTEED YIELD: In 1990-91 this component of the Foundation School Program guaranteed districts \$17.90 per student, per penny of tax effort above \$0.54. If a penny of local tax only generates half of the \$17.90, the state provides the other half. Regardless of the portion of the \$17.90 the local district is able to raise through a penny of tax effort, the state will contribute the rest, up to a total of \$17.90. Districts able to generate \$17.90 per student, per penny of effort on their own receive no guaranteed yield. The guaranteed yield is also referred to as the second tier of the Foundation School Program.

LOCAL FUND ASSIGNMENT: The portion of the Foundation School Program allocation, as determined by state formulas, that is assigned to the district to raise. Until 1989-90 districts were not required to raise this amount in order to receive state funds, but in fact most did. With the passage of Senate Bill 1019, raising the LFA became mandatory. While the tax rate for the LFA is fixed for all districts, the dollar amount of the LFA, or local share, varies with the district's property wealth. The poorer the district, the smaller the LFA and the greater the amount of state aid.

PEIMS: The *Public Education Information Management System* is the primary means through which the Texas Education Agency collects information on the staff, students and finances of all school districts in the state.

AVERAGE DAILY ATTENDANCE: Student attendance information is reported for the three six-week periods in the fall and the three six-week periods in the spring on the *Principal's Semester Report of Student Attendance and Contact Hours*.

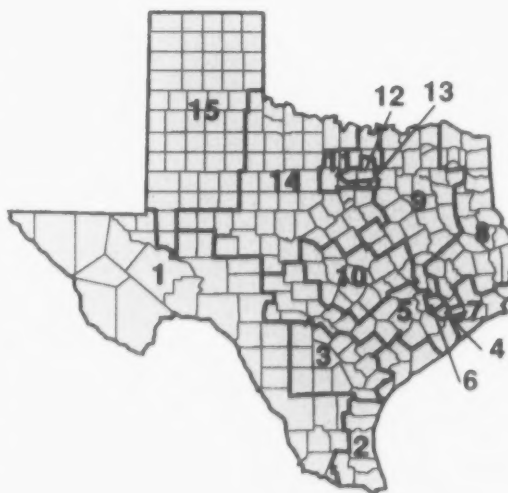

Table I. For each district, full-year ADA is calculated as the sum of the number of students in attendance for the 6 six-week periods divided by 175 days.

STAFF CATEGORIES DEFINED BY ROLE ID: Staff information from the fall 1990 PEIMS responsibility records was aggregated into categories using the reported role identifiers. *Exhibit C* lists this detail.

STATE BOARD OF EDUCATION - MAP OF DISTRICT BOUNDARIES: The map in *Exhibit D* illustrates the 15 SBOE district boundaries. Members of the SBOE are listed on page iii of this document.

TUITION TRANSFERS: Expenditures budgeted by districts for the cost of sending students to other districts for instruction. Because the transferring district does not count the enrollment of transferred students, including the expenditure would distort per pupil amounts. Therefore, in this publication amounts budgeted for tuition transfers have been excluded. Tuition transfers are defined as the total of objects 6231-Tuition Services, 6232-Transportation Services, and 6239-Other Services. However, if there are no expenditures for 6231, then 6232 and 6239 are not excluded.

COMPLIANCE STATEMENT

TITLE VI, CIVIL RIGHTS ACT OF 1964; THE MODIFIED COURT ORDER, CIVIL ACTION 5281, FEDERAL DISTRICT COURT, EASTERN DISTRICT OF TEXAS, TYLER DIVISION

Reviews of local education agencies pertaining to compliance with Title VI Civil Rights Act of 1964 and with specific requirements of the Modified Court Order, Civil Action No. 5281, Federal District Court, Eastern District of Texas, Tyler Division are conducted periodically by staff representatives of the Texas Education Agency. These reviews cover at least the following policies and practices:

- (1) acceptance policies on student transfers from other school districts;
- (2) operation of school bus routes or runs on a non-segregated basis;
- (3) nondiscrimination in extracurricular activities and the use of school facilities;
- (4) nondiscriminatory practices in the hiring, assigning, promoting, paying, demoting, reassigning, or dismissing of faculty and staff members who work with children;
- (5) enrollment and assignment of students without discrimination on the basis of race, color, or national origin;
- (6) nondiscriminatory practices relating to the use of a student's first language; and
- (7) evidence of published procedures for hearing complaints and grievances.

In addition to conducting reviews, the Texas Education Agency staff representatives check complaints of discrimination made by a citizen or citizens residing in a school district where it is alleged discriminatory practices have occurred or are occurring.

Where a violation of Title VI of the Civil Rights Act is found, the findings are reported to the Office for Civil Rights, U.S. Department of Education.

If there is a direct violation of the Court Order in Civil Action No. 5281 that cannot be cleared through negotiation, the sanctions required by the Court Order are applied.

TITLE VII, CIVIL RIGHTS ACT OF 1964; EXECUTIVE ORDERS 11246 AND 11375; TITLE IX, 1973 EDUCATION AMENDMENTS; REHABILITATION ACT OF 1973 AS AMENDED; 1974 AMENDMENTS TO THE WAGE-HOUR LAW EXPANDING THE AGE DISCRIMINATION IN EMPLOYMENT ACT OF 1967; AND VIETNAM ERA VETERANS READJUSTMENT ASSISTANCE ACT OF 1972 AS AMENDED IN 1974.

It is the policy of the Texas Education Agency to comply fully with the nondiscrimination provisions of all federal and state laws and regulations by assuring that no person shall be excluded from consideration for recruitment, selection, appointment, training, promotion, retention, or any other personnel action, or be denied any benefits or participation in any programs or activities which it operates on the grounds of race, religion, color, national origin, sex, handicap, age, or veteran status (except where age, sex, or handicap constitute a bona fide occupational qualification necessary to proper and efficient administration). The Texas Education Agency makes positive efforts to employ and advance in employment all protected groups.
